Answer: C

## 1500 + Free Must Solved SSC Questions (With Solutions)

Question 17

Which of the following is a Trans Himalayan river ?

- A Ganga
- B Yamuna
- C Sutlej
- D Ravi

Answer: C

Question 18

Match the following using codes given below :

List I (Forest Type)

- a. Tropical Evergreen
- b. Monsoon
- c. Temperate
- d. Mangrove

List II (Regions)

- 1. Siwaliks
- 2. Shillong
- 3. West Bengal
- 4. Nilgiris

- A a-2, b-4, c-1, d-3
- B a-3, b-1, c-4, d-2
- C a-2, b-1, c-4, d-3
- D a-3, b-4, c-1, d-2

Answer: C

Question 19

On which river is the Nagarjunasagar Project located ?

- A Krishna
- B Godavari
- C Cauvery
- D Tapti

Answer: A

Question 52

The Government wanted to play the role (a)/ of a felicitor only and was (b)/ keen on optimal development. (c)/ No error (d)

A The Government wanted to play the role

B of a felicitor only and was

C keen on optimal development.

D No Error

Answer: B

**Question 53**

Admittance for (a)/ the inaugural ceremony was (b)/ only by special tickets. (c)/ No error (d)

- A Admittance for
- B the inaugural ceremony was
- C only by special tickets.
- D No Error

**Answer: A**

**Question 54**

Pulses when well cooked (a)/ are not only appetizing (b)/ as well as nutritious. (c)/ No error (d)

- A Pulses when well cooked
- B are not only appetizing
- C as well as nutritious.
- D No Error

**Answer: C**

**SSC CGL Important Questions PDF**

**Question 55**

Martin Luther king was one of the leaders (a)/ who (b)/ has follow(ed Mahatma Gandhi.(c)/ No error (d)

- A Martin Luther king was one of the leaders
- B who
- C has followed Mahatma Gandhi.
- D No Error

**Answer: C**

**Instructions**

In the following questions, sentences are given with blanks to be filled in with an appropriate word(s). Four alternatives are suggested for each question. Choose the correct alternative out of the four as your answer.

**Question 56**

In certain traditions, the husband is \_\_\_\_\_ as the breadwinner and the wife is expected to play a \_\_\_\_\_ role.

- A counted; unequal
- B treated; unique
- C perceived; subordinate
- D believed; subservient

**Answer: C**

**Answer: B**

**Question 90**

- A gauge
- B gauze
- C gaudy
- D gaurantee

**Answer: D**

## SSC CGL Previous Papers (DOWNLOAD PDF)

**Instructions**

In the following questions, you have a brief passage with 5 questions following it. Read the passage carefully and choose the best answer to each question out of the four alternatives.

Modernity snobbery, though not exclusive to our age, has come to assume an unprecedented importance. The reasons for this are simple and of a strictly economic character. Thanks to modern machinery, production is outrunning consumption. Organized waste among consumers is the first condition of our industrial prosperity. The sooner a consumer throws away the object he has bought and buys another, the better for the producer. At the same time the producer must do his bit by producing nothing but the most perishable articles.

**Question 91**

**The expression 'production is outrunning consumption' means**

- A production is falling short of consumption
- B consumption is much more than production
- C production is in excess of consumption
- D production and consumption are running close to each other

**Answer: C**

**Question 92**

**The best definition of the term 'Modernity snobbery' is**

- A paying too much attention to use things of the latest design
- B giving undue attention to social position
- C better status for those who are uptodate
- D those who are modern get more respect in the society

**Answer: A**

**Question 93**

According to the author, 'modern machinery' is giving rise to

- A more waste
- B industrial prosperity .
- C more markets
- D variety to the consumers

**Answer: B**

**SSC CGL Tier-2 Previous Papers PDF**

**Question 94**

The production of more dispensable articles is necessary because it will

- A satisfy the immediate needs of the customers
- B compel the customers to go in for new articles
- C attract more customers
- D keep the factories working

**Answer: D**

**Question 95**

For industrial prosperity, 'modernity snobbery' is important because it induces people to

- A buy only the most expensive articles to maintain social position
- B help in the production of duplicate articles
- C buy articles which are perishable
- D discard old things for new ones

**Answer: D**

**Instructions**

In the following questions, you have a brief passage with 5 questions following it. Read the passage carefully and choose the best answer to each question out of the four alternatives.

Reality television is a genre of television programming which, it is claimed, presents unscripted dramatic or humorous situations, documents, actual events, and features ordinary people rather than professional actors. Although the genre has existed in some form or another since the early years of television, the current explosion of popularity dates from around 2000. Part of reality television's appeal is due to its ability to place ordinary people in extraordinary situations. Reality television also has the potential to turn its participants into national celebrities, in talent and performance programmes such as Pop Idd, though frequently 'Survivor' and 'Big Brother' participants also reach some degree of celebrity. Some commentators have said that the name "reality television" is an inaccurate description for several styles of programmes included in the genre. In competition based programmes such as 'Survivor' and other special living environment shows like 'The Real World', the producers design the format of the show and control the day to day activities and the environment, creating a completely fabricated world in which the competition is worked out. Producers specifically select the participants, and use carefully designed scenarios, challenges, events, and settings to encourage particular behaviour and conflicts.

**Question 96**

The participants in the Reality Shows are

- A comedians
- B national celebrities
- C professional actors
- D ordinary people

**Answer:** D

## 200 SSC Mocks for just Rs. 249 - Enroll now

### Question 97

The format of competition based programmes is decided by the

- A writer of the script
- B professional actors
- C producer
- D participants

**Answer:** C

### Question 98

In the first sentence, the writer says, 'it is claimed' because

- A some people insist on the statement
- B he wants to distance himself from the statement
- C he agrees with the statement
- D everyone agrees with the statement

**Answer:** B

### Question 99

Reality television

- A has only been popular since 2000
- B has been popular approximately since 2000
- C has been popular since the start of television
- D has been popular since well before 2000

**Answer:** B

## SSC CGL Important Questions PDF

### Question 100

Reality TV appeals to some because it

- A shows average people in exceptional circumstances
- B can turn ordinary people into celebrities
- C shows eligible males dating women
- D uses exotic locations

Answer: A

## 1500 + Free Must Solved SSC Questions (With Solutions)

### Quant

#### Instructions

For the following questions answer them individually

#### Question 101

If  $\cot A + \frac{1}{\cot A} = 2$ , then  $\cot^2 A + \frac{1}{\cot^2 A}$  is equal to

- A 4
- B 5
- C 1
- D 2

Answer: D

#### Explanation:

$$\text{Expression : } \cot A + \frac{1}{\cot A} = 2$$

Squaring both sides, we get :

$$\Rightarrow \cot^2 A + \frac{1}{\cot^2 A} + 2 \cdot \cot A \cdot \frac{1}{\cot A} = 4$$

$$\Rightarrow \cot^2 A + \frac{1}{\cot^2 A} = 4 - 2 = 2$$

## General Science Notes for SSC CGL

#### Question 102

If  $f(x) = \sin^2 x + \operatorname{cosec}^2 x$ , then the minimum value of  $f(x)$  is

- A 1
- B 1.5
- C 2
- D 3

Answer: C

#### Explanation:

$$\text{Expression : } f(x) = \sin^2 x + \operatorname{cosec}^2 x$$

$$= (\sin x - \operatorname{cosec} x)^2 + 2 \cdot \sin x \cdot \operatorname{cosec} x$$

$$= (\sin x - \operatorname{cosec} x)^2 + 2$$

Since,  $(\sin x - \operatorname{cosec} x)^2$  is always positive

$\Rightarrow$  Min value of  $f(x) = 2$

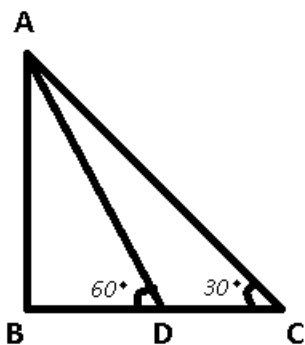

### Question 103

A car is travelling on a straight road leading to a tower. From a point at a distance of 500 m from the tower, as seen by the driver, the angle of elevation of the top of the tower is  $30^\circ$ . After driving towards the tower for 10 seconds, the angle of elevation of the top of the tower as seen by the driver is found to be  $60^\circ$ . Then the speed of the car is

- A 135 km/hr.
- B 110 km/hr.
- C 120 km/hr.
- D 90 km/hr.

Answer: C

Explanation:

$BC = 500$  m

Let  $CD$  be  $x \Rightarrow BD = 500 - x$

From  $\triangle ABC$

$$\Rightarrow \tan 30 = \frac{AB}{BC}$$

$$\Rightarrow \frac{1}{\sqrt{3}} = \frac{AB}{500}$$

$$\Rightarrow AB = \frac{500}{\sqrt{3}} \text{ m}$$

Now, from  $\triangle ABD$

$$\Rightarrow \tan 60 = \frac{AB}{BD}$$

$$\Rightarrow \sqrt{3} = \frac{\frac{500}{\sqrt{3}}}{500 - x}$$

$$\Rightarrow 3(500 - x) = 500$$

$$\Rightarrow 3x = 1000$$

$$\therefore x = \frac{1000}{3} \text{ metre} = \frac{1}{3} \text{ km}$$

Also, speed of car =  $\frac{\text{distance}}{\text{time}}$

$$= \frac{\frac{1}{3}}{\frac{10}{60 \times 60}} \text{ km/hr}$$

$$= 120 \text{ km/hr}$$

### Question 104

If  $\Theta$  is a positive acute angle and  $\tan \Theta + \cot \Theta = 2$ , then the value of  $\sec \Theta$  is

A  $\frac{1}{\sqrt{2}}$

B  $\sqrt{2}$

C 1

D 0

Answer: B

Explanation:

Expression :  $\tan\theta + \cot\theta = 2$

$\Rightarrow \tan\theta + \frac{1}{\tan\theta} = 2$

$\Rightarrow \tan^2\theta - 2\tan\theta + 1 = 0$

$\Rightarrow (\tan\theta - 1)^2 = 0$

$\Rightarrow \tan\theta = 1$

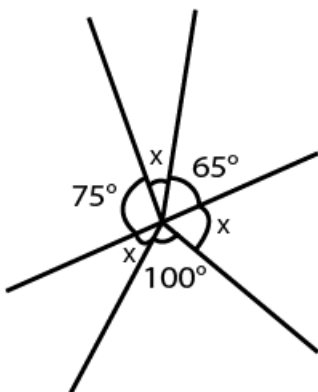

$\therefore \sec\theta = \sqrt{1 + \tan^2\theta}$

$= \sqrt{1 + 1} = \sqrt{2}$

## Free SSC Study Material (18,000 Solved Questions)

Question 105

The value of x in the following figure is

A  $40^\circ$

B  $70^\circ$

C  $50^\circ$

D  $60^\circ$

Answer: A

Explanation:

Here,  $x + 65^\circ + x + 100^\circ + x + 75^\circ = 360^\circ$

$\Rightarrow 3x + 240^\circ = 360^\circ$

$\Rightarrow x = \frac{120}{3} = 40^\circ$

Question 106

The angle of depression of a point from the top of a 200 m high tower is  $45^\circ$ . The distance of the point from the tower is

A  $\frac{200}{\sqrt{3}}$

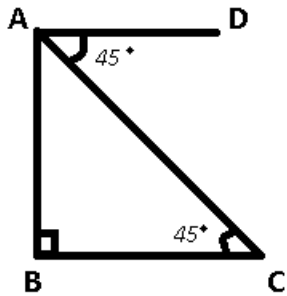

B  $200m$

C  $200\sqrt{3}m$

D None of these

Answer: B

Explanation:

$AB = \text{tower} = 200 \text{ m}$

$\angle DAC = \angle ACB = 45$

From  $\triangle ABC$

$\Rightarrow \tan 45 = \frac{AB}{BC}$

$\Rightarrow 1 = \frac{200}{BC}$

$\Rightarrow BC = 200m$

Question 107

If  $\sin\theta + \cos\theta = \sqrt{2}\sin(90^\circ - \theta)$ , then  $\cot\theta$  is equal to

A  $\sqrt{2} + 1$

B  $\frac{1}{\sqrt{2}} + 2$

C  $\sqrt{20} - 1$

D None of these

Answer: A

Explanation:

Expression:  $\sin\theta + \cos\theta = \sqrt{2}\sin(90^\circ - \theta)$

$\Rightarrow \sin\theta + \cos\theta = \sqrt{2}\cos\theta$

$\Rightarrow \sin\theta = \cos\theta(\sqrt{2} - 1)$

$\Rightarrow \frac{\cos\theta}{\sin\theta} = \frac{1}{\sqrt{2}-1}$

$\Rightarrow \cot\theta = \frac{1}{\sqrt{2}-1} \times \frac{\sqrt{2}+1}{\sqrt{2}+1}$

$\Rightarrow \cot\theta = \sqrt{2} + 1$

**Question 108**

If A and B are positive acute angles such that  $\sin(A - B) = 1/2$  and  $\cos(A + B) = 1/2$ , then A and B are given by

- A  $A = 45^\circ, B = 15^\circ$
- B  $A = 15^\circ, B = 45^\circ$
- C  $A = 30^\circ, B = 30^\circ$
- D None of these

**Answer: A**

**Explanation:**

$$\sin(A - B) = \frac{1}{2} = \sin 30^\circ$$

$$\Rightarrow A - B = 30^\circ \text{ -----Eqn(1)}$$

$$\text{Again, } \cos(A + B) = \frac{1}{2} = \cos 60^\circ$$

$$\Rightarrow A + B = 60^\circ \text{ -----Eqn(2)}$$

Adding eqns (1) & (2)

$$2A = 90^\circ$$

$$\Rightarrow A = 45^\circ \text{ and } B = 15^\circ$$

**Question 109**

If  $7\sin^2\theta + 3\cos^2\theta = 4$ , and  $\theta$  is a positive acute angle, then  $\tan\theta$  is equal to

- A  $1/3$
- B  $1/7$
- C  $\frac{1}{\sqrt{3}}$
- D  $\sqrt{3}$

**Answer: C**

**Explanation:**

$$\text{Expression : } 7\sin^2\theta + 3\cos^2\theta = 4$$

$$\Rightarrow 7(1 - \cos^2\theta) + 3\cos^2\theta = 4$$

$$\Rightarrow 7 - 4\cos^2\theta = 4$$

$$\Rightarrow \cos^2\theta = \frac{3}{4}$$

$$\Rightarrow \sec^2\theta = \frac{4}{3}$$

$$\therefore \tan\theta = \sqrt{\sec^2\theta - 1} = \sqrt{\frac{4}{3} - 1}$$

$$= \frac{1}{\sqrt{3}}$$

**Question 110**

A wheel makes 360 revolutions in a minute. The number of radians through which it turns in one second is

- A  $12\pi^c$
- B  $11\pi^c$

C  $10\pi^c$

D  $8\pi$

Answer: A

Explanation:

Number of revolutions made by wheel in 1 second =  $360/60 = 6$

Angle traced in one revolution =  $2\pi^c$

=> Angle traced in 6 revolutions =  $6 \times 2\pi = 12\pi^c$

SSC Free Preparation App

Question 111

$\frac{\sec^2\theta - \cot^2(90^\circ - \theta)}{\operatorname{cosec}^2 67^\circ - \tan^2 23^\circ} + \sin^2 40^\circ + \sin^2 50^\circ$  is equal to

A 0

B 4

C 2

D 1

Answer: C

Explanation:

$$\begin{aligned} \text{Expression : } & \frac{\sec^2\theta - \cot^2(90^\circ - \theta)}{\operatorname{cosec}^2 67^\circ - \tan^2 23^\circ} + \sin^2 40^\circ + \sin^2 50^\circ \\ & = \frac{\sec^2\theta - \tan^2\theta}{\operatorname{cosec}^2 67^\circ - \tan^2(90 - 67)} + \sin^2 40 + \sin^2(90 - 40) \\ & = \frac{1}{\operatorname{cosec}^2 67^\circ - \cot^2 67} + \sin^2 40 + \cos^2 40 \\ & = 1 + 1 = 2 \end{aligned}$$

Question 112

If P denotes the perimeter and S denotes the sum of the distances of a point within a triangle from its angular points, then

A  $P < S$

B  $P = S$

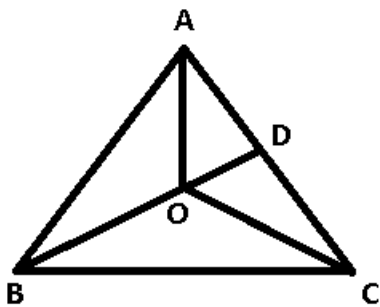

C  $S < P$

D Can't be determined

Answer: C

Explanation:

BO is extended to D

In  $\triangle ABD$

$$AB + AD > BD$$

$$\Rightarrow AB + AD > OB + OD \text{ -----Eqn(1)}$$

In  $\triangle ODC$

$$OD + DC > OC \text{ -----Eqn(2)}$$

Adding eqn (1) & (2)

$$AB + AD + OD + DC > OB + OD + OC$$

$$\Rightarrow AB + AC > OB + OC \text{ -----Eqn(3)}$$

Similarly,

$$BC + BA > OA + OC \text{ -----Eqn(4)}$$

$$\text{and, } CA + CB > OA + OB \text{ -----Eqn(5)}$$

Adding eqns (3),(4) & (5), we get :

$$2 (AB + BC + CA) > 2 (OA + OB + OC)$$

$$\Rightarrow AB + BC + CA > OA + OB + OC$$

$\therefore P > S$

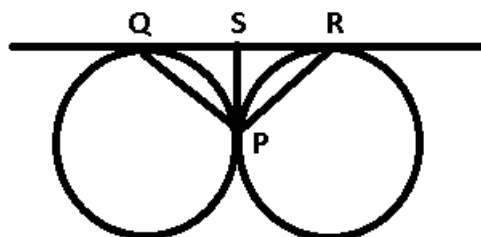

### Question 113

Two circles touch each other externally at a point P and a direct common tangent touches the circles at the points Q and R respectively. Then  $\angle QPR$  is

- A  $45^\circ$
- B  $180^\circ$
- C  $90^\circ$
- D  $60^\circ$

Answer: C

Explanation:

Since QS and SP are tangents from the same point S  $\Rightarrow QS = SP$

$\Rightarrow$  In  $\triangle QSP$ ,  $\angle SQP = QPS$

$\Rightarrow \angle SQP + \angle QPS + \angle PSQ = 180^\circ$

$\Rightarrow \angle QPS = 90/2 = 45^\circ$

Similarly,  $\angle SPR = 45^\circ$

Adding above two equations, we get :

$\Rightarrow \angle QPS + \angle SPR = 45^\circ + 45^\circ$

$\Rightarrow \angle QPR = 90^\circ$

## Daily Free SSC Practice Set

### Question 114

In triangle ABC, AB = 12 cm,  $\angle B = 60^\circ$ , the perpendicular from A to BC meets it at D. The bisector of  $\angle ABC$  meets AD at E. Then E divides AD in the ratio

A 3 : 1

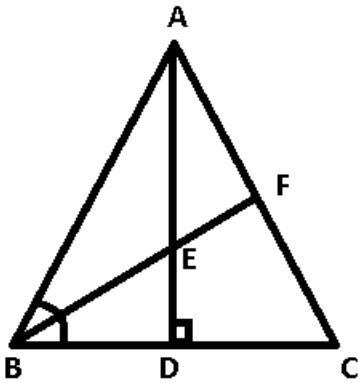

B 6 : 1

C 1 : 1

D 2 : 1

Answer: D

Explanation:

Given :  $\angle ABC = 60^\circ$ , AB = 12 cm

To find : AE : ED

Solution : From  $\triangle ABD$

$$\Rightarrow \sin 60 = \frac{AD}{AB}$$

$$\Rightarrow \frac{\sqrt{3}}{2} = \frac{AD}{12}$$

$$\Rightarrow AD = 6\sqrt{3} \text{ cm}$$

Again,

$$\Rightarrow \cos 60 = \frac{BD}{AB}$$

$$\Rightarrow \frac{1}{2} = \frac{BD}{12}$$

$$\Rightarrow BD = 6 \text{ cm}$$

Also, BF is angle bisector of angle B  $\Rightarrow \angle EBD = 30^\circ$

From  $\triangle BDE$

$$\Rightarrow \tan 30 = \frac{DE}{BD}$$

$$\Rightarrow \frac{1}{\sqrt{3}} = \frac{DE}{6}$$

$$\Rightarrow DE = 2\sqrt{3} \text{ cm}$$

$$\therefore \frac{AE}{ED} = \frac{AD-ED}{ED}$$

$$= \frac{6\sqrt{3}-2\sqrt{3}}{2\sqrt{3}}$$

$$= \frac{4\sqrt{3}}{2\sqrt{3}} = 2$$

$\Rightarrow$  Required ratio = 2 : 1

#### Question 115

If  $a : b = 2 : 3$ ,  $b : c = 4 : 5$  and  $c : d = 6 : 7$ , then  $a : d =$

A 12 : 35

B 24 : 35

C 16 : 35

D 24 : 25

Answer: C

Explanation:

$$\frac{a}{b} = \frac{2}{3}$$

$$\frac{b}{c} = \frac{4}{5}$$

$$\frac{c}{d} = \frac{6}{7}$$

Multiplying all the equations, we get :

$$\Rightarrow \frac{a}{b} * \frac{b}{c} * \frac{c}{d} = \frac{2}{3} * \frac{4}{5} * \frac{6}{7}$$

$$\Rightarrow \frac{a}{d} = \frac{16}{35}$$

#### Question 116

The value of  $\sqrt{3 \times 0.000729^{1/3}}$  is

A 0.03

B 0.09

C 0.9

D 0.52

Answer: D

Explanation:

we need to find value of  $\sqrt{3 \times 0.000729^{1/3}}$

$$= \sqrt{3 \times 0.000729^{1/3}} = \sqrt{3 \times 0.09}$$

$$= 0.3\sqrt{3}$$

$$= 0.519 \sim 0.52$$

Question 117

If the average of  $x$  and  $\frac{1}{x}$  be 1, then the value of  $x^{10} + \frac{1}{x^{10}}$  is

- A -2
- B 2
- C 0
- D 1

Answer: B

Explanation:

here it is given that

$$x + \frac{1}{x} = 2$$

and it is possible only when  $x = 1$

and hence we will put  $x = 1$  in  $x^{10} + \frac{1}{x^{10}} = 1 + 1 = 2$

Question 118

If the operation  $\Theta$  is defined for all real numbers  $a$  and  $b$  by the relation  $a\Theta b = a^2 \frac{b}{3}$  then  $2\Theta 3\Theta(-1) = ?$

- A 2
- B 4
- C -4
- D -2

Answer: C

Explanation:

It is given that  $a\Theta b = a^2 \frac{b}{3}$

Applying the same rule for  $2\Theta 3\Theta(-1)$

$$\begin{aligned} &= 2\Theta \frac{3^2 \times (-1)}{3} \\ &= 2\Theta -3 \\ &= \frac{2^2 \times (-3)}{3} = -4 \end{aligned}$$

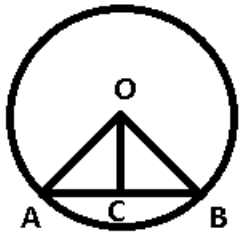

Question 119

O is the centre of a circle. AB is a chord of the circle but not its diameter. OC is perpendicular to AB. If  $OC = CB$  and radius of the circle be 7 cm, then the length of AB is

- A  $7\sqrt{2}$  cm
- B 14 cm
- C 7 cm
- D  $\frac{7}{\sqrt{2}}$  cm

Answer: A

Explanation:

Since, OC is perpendicular to AB

Also, OC = BC

=> In  $\triangle OBC$

$$\Rightarrow OB^2 = OC^2 + BC^2$$

$$\Rightarrow 7^2 = 2BC^2$$

$$\Rightarrow BC = \frac{7}{\sqrt{2}}$$

$$\therefore AB = 2 * AC = 2 * \frac{7}{\sqrt{2}}$$

$$= 7\sqrt{2} \text{ cm}$$

## SSC CHSL Previous Question papers (download pdf)

Question 120

In  $\triangle ABC$ , D, E, F are midpoints of AB, BC, CA respectively and  $\angle B = 90^\circ$ , AB = 6 cm, BC = 8 cm. Then area of  $\triangle DEF$  (in sq. cm) is

A 24

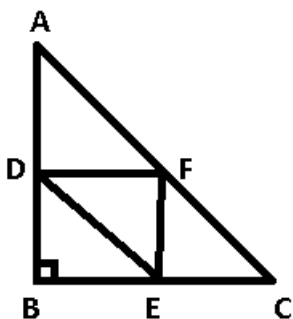

B 28

C 6

D 12

Answer: C

Explanation:

Given : AB = 6 cm and BC = 8 cm

To find : area of  $\triangle DEF$

Solution : Since D, E and F are mid points of AB, BC and AC

$$\Rightarrow \text{area of } \triangle DEF = \frac{1}{4} \triangle ABC$$

$$= \frac{1}{4} * \frac{1}{2} * 8 * 6 = 6 \text{ sq. cm}$$

**Question 121**

If in a triangle ABC, the angles at B and C are 1.5 and 2.5 times of the angle at A respectively, then angle at B is

- A  $36^\circ$
- B  $54^\circ$
- C  $48^\circ$
- D  $72^\circ$

**Answer: B**

**Explanation:**

Let  $\angle A = 2x$

$$\Rightarrow \angle B = 1.5 * 2x = 3x$$

$$\Rightarrow \angle C = 2.5 * 2x = 5x$$

Now, in  $\triangle ABC$

$$\Rightarrow \angle A + \angle B + \angle C = 180^\circ$$

$$\Rightarrow 2x + 3x + 5x = 180^\circ$$

$$\Rightarrow x = 18^\circ$$

$$\therefore \angle B = 3 * 18 = 54^\circ$$

**Question 122**

In xyplane, a straight line  $L_1$  bisects the 1st quadrant and another straight line  $L_2$  trisects the 2nd quadrant being closer to the axis of y. The acute angle between  $L_1$  and  $L_2$  is

- A  $60^\circ$
- B  $120^\circ$
- C  $90^\circ$
- D  $75^\circ$

**Answer: D**

**Explanation:**

The line  $L_1$  bisects the 1st quadrant

$$\Rightarrow \text{Angle between y-axis and } L_1 = 45^\circ$$

Also,  $L_2$  trisects the 2nd quadrant

$$\Rightarrow \text{Angle between y-axis and } L_2 = 30^\circ$$

$$\therefore \text{Acute angle between } L_1 \text{ and } L_2 = 45^\circ + 30^\circ = 75^\circ$$

**Free SSC Study Material (18,000 Solved Questions)**

**Question 123**

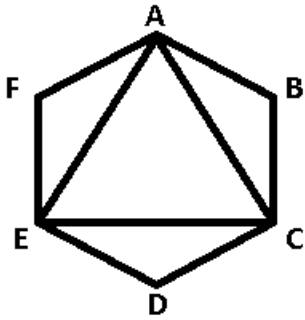

If ABCDEF is a regular hexagon, then  $\triangle ACE$  is

- A a rightangled triangle
- B an obtuseangled triangle

- C an isosceles triangle
- D an equilateral triangle

Answer: D

Explanation:

Sum of all angles of the hexagon =  $(n - 2) * 180^\circ$

$$= (6-2)*180^\circ = 720^\circ$$

$$\Rightarrow \text{Each interior angle} = \frac{720^\circ}{6} = 120^\circ$$

Since,  $AB = BC$

$$\Rightarrow \angle BAC = \angle ACB = 30^\circ$$

$$\Rightarrow \angle ACE = \angle CEA = \angle EAC = 60^\circ$$

$$\Rightarrow AC = CE = EA$$

$\Rightarrow \triangle ACE$  is an equilateral triangle.

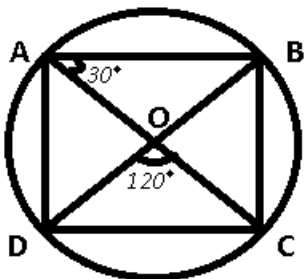

**Question 124**

ABCD is a cyclic quadrilateral whose vertices are equidistant from the point O (centre of the circle). If  $\angle COD = 120^\circ$  and  $\angle BAC = 30^\circ$ , then the measure of  $\angle BCD$  is

- A  $180^\circ$
- B  $150^\circ$
- C  $60^\circ$
- D  $90^\circ$

Answer: D

Explanation:

Given :  $OA = OB = OC = OD$

To find :  $\angle BCD = ?$

Solution :  $\angle COD + \angle BOC = 180^\circ$  [Linear Pair]

$$\Rightarrow \angle BOC = 180^\circ - 120^\circ = 60^\circ$$

Also,  $\angle OBC = \angle OCB$  [ $\because OB = OC$ ]

In  $\triangle BOC$

$$\Rightarrow \angle BOC + \angle OCB + \angle OBC = 180^\circ$$

$$\Rightarrow \angle OCB = \frac{120^\circ}{2} = 60^\circ \text{ -----Eqn(1)}$$

Also,  $\angle OAB = \angle OCD$  [Alternate interior angles]

$$\Rightarrow \angle OCD = 30^\circ \text{ -----Eqn(2)}$$

Adding eqn (1) & (2), we get :

$$\Rightarrow \angle OCB + \angle OCD = 60^\circ + 30^\circ$$

$$\Rightarrow \angle BCD = 90^\circ$$

#### Question 125

P owns  $\frac{2}{3}$  shares of a company and the rest of the shares is equally divided among Q and R. If the profit on each share increases from 5% to 7%, P earns an extra 800 rupees. The investment of R on the shares is

- A Rs. 20,000
- B Rs. 15,000
- C Rs. 10,000
- D Rs. 40,000

**Answer: C**

#### Explanation:

Let total shares of the company be  $6x$

$$\Rightarrow P = \frac{2}{3} * 6x = \text{Rs. } 4x$$

$$\Rightarrow Q = \text{Rs. } x \text{ and } R = \text{Rs. } x$$

$$\therefore 4x \times 2\% = 800$$

$$\Rightarrow 4x \times \frac{2}{100} = 800$$

$$\Rightarrow x = 10,000$$

$$\therefore R\text{'s investment} = x = \text{Rs. } 10,000$$

**Latest Job Updates on Telegram - Join here**

#### Question 126

A sum of money lent at compound interest for 2 years at 20% per annum would fetch Rs. 482 more, if the interest was payable half yearly than if it was payable annually. The sum is

- A Rs. 30,000
- B Rs. 40,000
- C Rs. 10,000
- D Rs. 20,000

**Answer: D**

#### Explanation:

case 1 : When amount is lent annually

$$\Rightarrow C.I. = P[(1 + \frac{R}{100})^T - 1]$$

$$= P[1 + \frac{20}{100}]^2 - 1]$$

$$= P(\frac{36}{25} - 1)$$

$$= \frac{11}{25}P \text{ -----Eqn(1)}$$

case 2 : When amount is lent half yearly

$$\Rightarrow C.I. = P[(1 + \frac{10}{100})^4 - 1]$$

$$= P[(\frac{11}{10})^4 - 1]$$

$$= \frac{4641}{10000}P \text{ -----Eqn(2)}$$

Subtracting eqn (1) from (2), we get :

$$\Rightarrow \frac{4641}{10000}P - \frac{11}{25}P = 482$$

$$\Rightarrow 241P = 4820000$$

$$\Rightarrow P = Rs.20,000$$

#### Question 127

A man travels  $\frac{2}{15}$  of the total journey by rail,  $\frac{9}{20}$ , by car and the remaining 10 km on foot. His total journey in km is

- A 36
- B 40
- C 30
- D 24

Answer: D

#### Explanation:

Let his total journey be  $60x$  km

$$\text{Distance travelled by rail} = \frac{2}{15} * 60x = 8x$$

$$\text{Distance travelled by car} = \frac{9}{20} * 60x = 27x$$

$$\text{Remaining distance} = 60x - 8x - 27x = 25x$$

Acc to ques :

$$\Rightarrow 25x = 10$$

$$\Rightarrow x = \frac{2}{5}$$

$$\Rightarrow \text{Total journey} = \frac{2}{5} * 60 = 24 \text{ km}$$

#### Question 128

A merchant bought 140 cupboards at an auction. He sold 80 of them at a profit of Rs. 4,000 and the rest at a loss of Rs. 1,200. On the whole, he gained 10%. Then the cost of each cupboard is

- A Rs. 210
- B Rs. 190
- C Rs. 200
- D Rs. 180

**Answer:** C

**Explanation:**

Let the cost price of each cupboard be Rs  $x$

Total cost price =  $140x$

Selling price of first 80 cupboards =  $80x + 4,000$

Selling price of the rest 60 cupboards =  $60x - 1,200$

$\Rightarrow$  Total selling price of the cupboards =  $140x + 2,800$

Also, he overall gained 10%,  $\Rightarrow$  Selling price =  $140x + \frac{10}{100} * 140x = 154x$

$\Rightarrow 154x = 140x + 2800$

$\Rightarrow x = \frac{2800}{14} = 200$

Thus, cost of each cupboard = Rs 200

## SSC CGL Free Mock Test

**Question 129**

If  $3x^2 - 4x - 3 = 0$ , then the value of  $x - 1/x$  is

A 3

B 4

C  $3/4$

D  $4/3$

**Answer:** D

**Explanation:**

Expression :  $3x^2 - 4x - 3 = 0$

$\Rightarrow 3x^2 - 3 = 4x$

On dividing by  $3x$  on both sides, we get :

$\Rightarrow x - \frac{1}{x} = \frac{4}{3}$

**Question 130**

a : b for the greatest possible value of  $5 - (3a - b)^2$  is

A 3 : 5

B 1 : 5

C 1 : 3

D 3 : 1

**Answer:** C

**Explanation:**

The value of the expression  $5 - (3a - b)^2$  will be maximum if

$3a - b = 0$

$\Rightarrow 3a = b$

$$\Rightarrow \frac{a}{b} = \frac{1}{3}$$

$\therefore$  Required ratio = 1 : 3

#### Question 131

If  $a + b + c = 6$ ,  $a^2 + b^2 + c^2 = 14$ , find the value of  $bc + ca + ab$ .

- A 22
- B 25
- C 20
- D 11

Answer: D

#### Explanation:

It is given that :  $a + b + c = 6$  and  $a^2 + b^2 + c^2 = 14$

Also,  $(a + b + c)^2 = a^2 + b^2 + c^2 + 2(ab + bc + ca)$

$$\Rightarrow 6^2 = 14 + 2(ab + bc + ca)$$

$$\Rightarrow ab + bc + ca = \frac{22}{2} = 11$$

## SSC CGL Previous Papers (DOWNLOAD PDF)

#### Question 132

Find the value of the expression  $x^5 - 12x^4 + 12x^3 - 12x^2 + 12x - 1$  when  $x = 11$ .

- A 12
- B 0
- C 10
- D 11

Answer: C

#### Explanation:

Expression :  $x^5 - 12x^4 + 12x^3 - 12x^2 + 12x - 1$

$$= x^5 + (-11x^4 - x^4) + (11x^3 + x^3) + (-11x^2 - x^2) + (11x + x) - 1$$

$$= (x^5 - 11x^4) + (11x^3 - x^4) + (x^3 - 11x^2) + (11x - x^2) + (x - 1)$$

$$= x^4(x - 11) + x^3(11 - x) + x^2(x - 11) + x(11 - x) + (x - 1)$$

Putting  $x = 11$

$$= 11 - 1 = 10$$

#### Question 133

If  $x + \frac{1}{x} = 2$ , find the value of  $(x^2 + \frac{1}{x^2})(x^3 + \frac{1}{x^3})$

- A 8
- B 2
- C 6

D 4

Answer: D

Explanation:

Expression :  $x + \frac{1}{x} = 2$

Squaring both sides, we get :

$$\Rightarrow \left(x + \frac{1}{x}\right)^2 = 2^2$$

$$\Rightarrow x^2 + \frac{1}{x^2} + 2 = 4$$

$$\Rightarrow x^2 + \frac{1}{x^2} = 2$$

Now, cubing the given expression, we get :

$$\Rightarrow \left(x + \frac{1}{x}\right)^3 = 2^3$$

$$\Rightarrow x^3 + \frac{1}{x^3} + 3 \cdot x \cdot \frac{1}{x} \cdot \left(x + \frac{1}{x}\right) = 8$$

$$\Rightarrow x^3 + \frac{1}{x^3} + 3 \cdot 2 = 8$$

$$\Rightarrow x^3 + \frac{1}{x^3} = 2$$

To find :  $\left(x^2 + \frac{1}{x^2}\right)\left(x^3 + \frac{1}{x^3}\right)$

$$= 2 \cdot 2 = 4$$

Question 134

If  $x = \frac{3\sqrt{m+1}+3\sqrt{m-1}}{3\sqrt{m+1}-3\sqrt{m-1}}$ , then the value of  $x^3 - 3mx^3 + 3x - m$  is

A 0

B  $m - 1/m$

C  $m + 1/m$

D 1

Answer: A

## SSC CGL Tier-2 Previous Papers PDF

Question 135

A can finish a work in 24 days, B in 9 days and C in 12 days. B and C start the work but they are forced to leave after 3 days. The remaining work was done by A in

A 10 days

B  $10 \frac{1}{2}$  days

C 5 days

D 6 days

Answer: A

Explanation:

Let the total work be 72 units

$$\text{Rate at which A finishes the work alone} = \frac{72}{24} = 3 \text{ units/day}$$

Rate at which B finishes the work alone =  $\frac{72}{9} = 8$  units/day

Rate at which C finishes the work alone =  $\frac{72}{12} = 6$  units/day

Now, B & C work together for 3 days =  $(8 + 6) * 3 = 42$  units

Work left =  $72 - 42 = 30$  units

Remaining work is done by A in =  $\frac{30}{3} = 10$  days

**Question 136**

When 7 is subtracted from thrice a number, the result is 14. What is the number ?

- A 8
- B 9
- C 6
- D 7

**Answer:** D

**Explanation:**

Let the number be  $x$

Acc to ques :

$$\Rightarrow 3x - 7 = 14$$

$$\Rightarrow x = \frac{21}{3} = 7$$

**Question 137**

The least number which should be multiplied to 243 to get a perfect cube is

- A 6
- B 9
- C 2
- D 3

**Answer:** D

**Explanation:**

$$243 = 3 * 3 * 3 * 3 * 3$$

$$= 3^3 * 3^2$$

Thus, required number to be multiplied = 3

**200 SSC Mocks for just Rs. 249 - Enroll now**

**Question 138**

In a basket, there are 125 flowers. A man goes to worship and offers as many flowers at each temple as there are temples in the city. Thus he needs 5 baskets of flowers. Find the number of temples in the city.

- A 25
- B 24
- C 27

D 26

Answer: A

Explanation:

Let the number of temples in the city be  $x$

Also, he offers  $x$  flowers in each temple

Total number of flowers he offered =  $x^2 = 5 \times 125$

$$\Rightarrow x = \sqrt{625} = 25$$

Question 139

Product of the three consecutive numbers whose sum is 15,

A 120

B 150

C 126

D 105

Answer: A

Explanation:

Let the three consecutive numbers be  $(x - 1), (x), (x + 1)$

Sum of these numbers =  $x - 1 + x + x + 1 = 15$

$$\Rightarrow x = 5$$

Numbers are = 4, 5 & 6

Product of these numbers =  $4 \times 5 \times 6 = 120$

Question 140

The simplified value of  $999\frac{1}{7} + 999\frac{2}{7} + 999\frac{3}{7} + 999\frac{4}{7} + 999\frac{5}{7} + 999\frac{6}{7}$  is

A  $10009\frac{2}{7}$

B  $5994\frac{6}{7}$

C  $9999\frac{2}{7}$

D 5997

Answer: D

Explanation:

we need to find value of  $999\frac{1}{7} + 999\frac{2}{7} + 999\frac{3}{7} + 999\frac{4}{7} + 999\frac{5}{7} + 999\frac{6}{7}$

$$6000 - \frac{1+2+3+4+5+6}{7}$$

$$= 6000 - \frac{21}{7}$$

$$= 6000 - 3 = 5997$$

SSC CGL Important Questions PDF

**Question 141**

50 boxes with equal weights were loaded in a ship. 5 more boxes each weighing 105 kg were later added, making the average weight of all the 55 boxes as 95 kg. The weight of each of the 50 boxes first loaded is

- A 98 kg
- B 94 kg
- C 95 kg
- D 92 kg

**Answer:** B

**Explanation:**

Let weight of each box be  $x$  kg

=> Total weight of 50 boxes =  $50x$  kg

Total weight of 5 additional boxes =  $105 \times 5 = 525$  kg

Acc to ques :

$$\Rightarrow \frac{50x + 525}{55} = 95$$

$$\Rightarrow 50x + 525 = 5225$$

$$\Rightarrow x = \frac{4700}{50}$$

$$\Rightarrow x = 94 \text{ kg}$$

**Question 142**

In a club, the average age of the members is 30 years, the average age of the male members is 34 years and that of the female members is 26 years. The percentage of the male members is

- A 50%
- B 60%
- C 30%
- D 40%

**Answer:** A

**Explanation:**

Let male members be  $x$  and female members be  $y$

=> Total members in the club =  $(x + y)$

Now, total age of male members =  $34x$

Total age of female members =  $26y$

Also, total age of all the members =  $30(x + y)$

Acc to ques :

$$\Rightarrow 34x + 26y = 30x + 30y$$

$$\Rightarrow 4x = 4y$$

$$\Rightarrow x = y$$

Now, % of male members =  $\frac{x}{x+y} \times 100$

$$= \frac{x}{2x} \times 100 = 50\%$$

**Question 143**

In 60 litres beverage, the ratio of syrup and water is 3 : 7. If the ratio of the syrup and water is to be made 2 : 5, then the amount of water to be further added is

- A 5 litres
- B 2.5 litres
- C 2 litres
- D 3 litres

**Answer:** D

**Explanation:**

The ratio of syrup and water is 3 : 7 in 60 litres beverage.

$$\Rightarrow \text{Quantity of syrup} = \frac{3}{10} * 60 = 18 \text{ litres}$$

$$\text{and quantity of water} = \frac{7}{10} * 60 = 42 \text{ litres}$$

Let the amount of water to be added is  $x$  litre

$$\text{Now, } \frac{18}{42+x} = \frac{2}{5}$$

$$\Rightarrow 84 + 2x = 90$$

$$\Rightarrow x = 6/2 = 3 \text{ litres}$$

## 1500 + Free Must Solved SSC Questions (With Solutions)

**Question 144**

If a trader sold an article at Rs.3,060 after allowing 15% and 10% successive discounts on marked price, then the marked price is

- A Rs. 5,000
- B Rs. 6,000
- C Rs. 3,000
- D Rs. 4,000

**Answer:** D

**Explanation:**

Let marked price =  $100x$

$$\text{After allowing discount of 15\%, price} = 100x - \frac{15}{100} * 100x = 85x$$

$$\text{After further allowing discount of 10\%, price} = 85x - \frac{10}{100} * 85x = 76.5x$$

$$\text{Now, selling price} = 76.5x = 3060$$

$$\Rightarrow x = \frac{3060}{76.5} = 40$$

$$\therefore \text{Marked Price} = 100 * 40 = \text{Rs } 4,000$$

**Question 145**

The area of a trapezium is 105 sq. m and, the lengths of its parallel sides are 9m and 12m respectively. Then the height of the trapezium is

- A 15 m

- B 12 m
- C 5 m
- D 10 m

**Answer: D**

**Explanation:**

Area of trapezium =  $\frac{1}{2} \times (\text{sum of parallel sides}) \times (\text{height})$

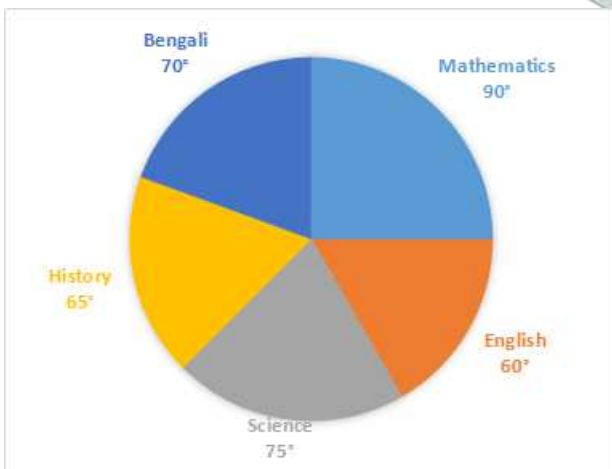

$$\Rightarrow \frac{1}{2} \times (9 + 12) \times h = 105$$

$$\Rightarrow h = \frac{105 \times 2}{21}$$

$$\Rightarrow h = 10m$$

**Instructions**

The following pie chart shows the marks obtained by a student in an examination, who scored 720 marks in all. Study the diagram and answer the questions given below.

**Question 146**

The marks scored in Science are

- A 200
- B 300
- C 75
- D 150

**Answer: D**

**Explanation:**

$$\text{the marks scored in science} = \frac{75}{360} \times 720 = 150$$

so the answer is option D.

## General Science Notes for SSC CGL

**Question 147**

The subject in which the student scored  $16 \frac{2}{3} \%$  of his total score is

- A Bengali

- B History
- C English
- D Mathematics

**Answer: C**

**Explanation:**

$$16 \frac{2}{3} \% = \frac{50}{3} \% = 16.66\%$$

$$\text{percentage in maths} = \frac{90}{360} \times 100 = 25\%$$

$$\text{percentage in english} = \frac{60}{360} \times 100 = 16.66\%$$

$$\text{percentage in bengali} = \frac{70}{360} \times 100 = 19.44\%$$

$$\text{percentage in history} = \frac{65}{360} \times 100 = 18.05\%$$

$$\text{percentage in science} = \frac{75}{360} \times 100 = 20.83\%$$

so the answer is option C.

**Question 148**

**The subject in which the student scored 180 marks is**

- A Mathematics
- B Bengali
- C English
- D Science

**Answer: A**

**Explanation:**

**method 1:**

$$\text{total marks} = 720$$

$$720 \text{ marks} = 360 \text{ degrees}$$

$$1 \text{ mark} = \frac{1}{2} \text{ degrees}$$

$$180 \text{ marks} = 90 \text{ degrees}$$

so the answer is option A.

**method 2:**

$$\text{The marks scored in Mathematics} = \frac{90}{360} \times 720 = 180$$

$$\text{The marks scored in English} = \frac{60}{360} \times 720 = 120$$

$$\text{The marks scored in Bengali} = \frac{70}{360} \times 720 = 140$$

$$\text{The marks scored in History} = \frac{65}{360} \times 720 = 130$$

$$\text{The marks scored in Science} = \frac{75}{360} \times 720 = 150$$

so the answer is option A.

**Question 149**

**The marks scored in Mathematics and English together differ from the total marks scored in Bengali, History and Science by**

- A 85

- B 61
- C 120
- D 72

**Answer: C**

**Explanation:**

The marks scored in Mathematics =  $\frac{90}{360} \times 720 = 180$

The marks scored in English =  $\frac{60}{360} \times 720 = 120$

The marks scored in Bengali =  $\frac{70}{360} \times 720 = 140$

The marks scored in History =  $\frac{65}{360} \times 720 = 130$

The marks scored in Science =  $\frac{75}{360} \times 720 = 150$

The marks scored in Mathematics and English together =  $180+120 = 300$

The marks scored in Bengali, History and Science together =  $140+130+150 = 420$

difference =  $420 - 300 = 120$

so the answer is option C.

## Free SSC Study Material (18,000 Solved Questions)

**Question 150**

The marks scored in English, differ from the marks scored in Science by

- A 75
- B 15
- C 30
- D 60

**Answer: C**

**Explanation:**

The marks scored in English =  $\frac{60}{360} \times 720 = 120$

The marks scored in Science =  $\frac{75}{360} \times 720 = 150$

difference =  $150 - 120 = 30$

so the answer is option C.

## SSC Exam Free Videos (Youtube)

### Reasoning

**Instructions**

In the following questions, select the related letters/word/number from the given alternatives.

**Question 151**

**Length : Metre :: Power : ?**

- A Calories

- B Degree
- C Watt
- D Kilogram

**Answer: C**

**Explanation:**

The SI unit of length is metre, similarly unit of Power is Watt.

=> Ans - (C)

**SSC Free Preparation App**

**Question 152**

**Square : Cube :: Circle : ?**

- A Ellipse
- B Parabola
- C Cone
- D Sphere

**Answer: D**

**Explanation:**

The 3 dimensional representation of a square is cube, similarly 3-D image of circle is sphere.

=> Ans - (D)

**Question 153**

**Paper : Tree :: Glass : ?**

- A Window
- B Sand
- C Stone
- D Mirror

**Answer: B**

**Explanation:**

Paper is made from trees, similarly glass is made up of liquid sand.

=> Ans - (B)

**Question 154**

**ACFJ : ZXUQ :: EGIN : ?**

- A VUSQ
- B VRPM
- C UTRP
- D VTRM

E	G	I	K
(+1)	(+2)	(+3)	(+4)
F	I	L	O

Similarly, for FHJL :

F	H	J	L
(+1)	(+2)	(+3)	(+4)
G	J	M	P

=> Ans - (D)

**Question 157**

10 : 91 :: 9 : ?

- A 69
- B 82
- C 89
- D 97

**Answer: B**

**Explanation:**

Expression = 10 : 91 :: 9 : ?

The pattern followed is =  $n : 9n + 1$

Eg =  $10 : 9 \times 10 + 1 = 10 : 91$

Similarly,  $9 \times 9 + 1 = 81 + 1 = 82$

=> Ans - (B)

**SSC CGL Free Online Coaching**

**Question 158**

7:56::9:?

- A 63
- B 81
- C 90
- D 99

**Answer: C**

**Explanation:**

Expression = 7:56::9:?

The pattern followed is =  $n : n^2 + n$

Eg =  $7 : 7^2 + 7 = 7 : 56$

Similarly,  $9^2 + 9 = 81 + 9 = 90$

=> Ans - (C)

**Question 159**

20 : 50 :: 100 : ?

- A 150
- B 250
- C 200
- D 156

**Answer:** B

**Explanation:**

Expression =  $20 : 50 :: 100 : ?$

The pattern followed is =  $n : 2.5n$

Eg =  $20 : 20 \times 2.5 = 20 : 50$

Similarly,  $100 \times 2.5 = 250$

=> Ans - (B)

**Instructions**

In the following questions, find the odd number/letters /number pair from the given alternatives.

**Question 160**

- A Pathology
- B Geology
- C Cardiology
- D Radiology

**Answer:** B

**Explanation:**

Apart from Geology, all terms given are related to medical science, hence it is the odd one out.

=> Ans - (B)

## SSC CHSL Previous Question papers (download pdf)

**Question 161**

- A Rivulet
- B Stream
- C River
- D Pond

**Answer:** D

**Explanation:**

Rivulet, river and stream are all water bodies formed by natural means, but pond can be formed artificially.

=> Ans - (D)

**Question 162**

- A Konark
- B Madurai

C Dilwara

D Ellora

**Answer: D**

**Explanation:**

All except Ellora are famous for temples, while Ellora is famous for caves.

=> Ans - (D)

**Question 163**

A RTW

B QOM

C IKG

D IKM

**Answer: A**

**Explanation:**

Consonants and vowels are used in the last three options, while only consonants are used in RTW.

=> Ans - (A)

## Free SSC Study Material (18,000 Solved Questions)

**Question 164**

A EFH

B OPQ

C BCE

D IJL

**Answer: B**

**Explanation:**

(A) : E (+1 letters) = F (+2 letters) = H

(B) : O (+1 letters) = P (+1 letter) = Q

(C) : B (+1 letters) = C (+2 letters) = E

(D) : I (+1 letters) = J (+2 letters) = L

=> Ans - (B)

**Question 165**

A DH

B FJ

C HK

D PR

**Answer: C**

**Explanation:**

- (A) : D (+4 letters) = H  
(B) : F (+4 letters) = J  
(C) : H (+3 letters) = K (odd)  
(D) : P (+2 letters) = R  
=> Ans - (C)

**Question 166**

- A 24  
B 49  
C 80  
D 15

**Answer: B**

**Explanation:**

$49 = 7^2$  which is a perfect square number, where as 24, 80, 15 are all non-square numbers.

=> Ans - (B)

**Latest Job Updates on Telegram - Join here**

**Question 167**

- A 121  
B 324  
C 523  
D 729

**Answer: C**

**Explanation:**

$$121 = 11^2$$

$$324 = 18^2$$

$$729 = 27^2$$

But 523 is not a perfect square number.

=> Ans - (C)

**Question 168**

- A 704, 11  
B 256, 4  
C 832, 13  
D 310, 5

**Answer: D**

**Explanation:**

Ratio of each pair is :

(A) :  $\frac{704}{11} = 64$

(B) :  $\frac{256}{4} = 64$

(C) :  $\frac{832}{13} = 64$

(D) :  $\frac{310}{5} = 62$

=> Ans - (D)

**Instructions**

For the following questions answer them individually

**Question 169**

Arrange the following words in their ascending order, as in a dictionary :

1. Pick
2. Pith
3. Pile
4. Perk
5. Pour

A 4, 1, 2, 3, 5

B 4, 1, 3, 2, 5

C 4, 3, 2, 1, 5

D 5, 4, 3, 2, 1

**Answer: B**

**Explanation:**

As per the order of dictionary :

= Perk -> Pick -> Pile -> Pith -> Pour

≡ 4, 1, 3, 2, 5

=> Ans - (B)

**SSC CGL Free Mock Test**

**Question 170**

Arrange the following words in their ascending order :

1. Millenium
2. Diamond Jubilee
3. Silver Jubilee
4. Centenary
5. Golden Jubilee

A 2, 3, 5, 4, 1

B 2, 5, 3, 1, 4

C 3, 5, 2, 4, 1

D 2, 3, 5, 1, 4

**Answer: C**

**Explanation:**

The correct order in ascending order is :

= Silver Jubilee (25 years) -> Golden Jubilee (50 years) -> Diamond Jubilee (75 years) -> Centenary (100 years) -> Millenium (1000)

years)

≡ 3, 5, 2, 4, 1

=> Ans - (C)

**Question 171**

Arrange the following words in their descending order:

1. Weekly
2. Biannual
3. Fortnightly
4. Monthly
5. Annual

A 1, 3, 4, 2, 5

B 2, 5, 4, 1, 3

C 4, 1, 2, 3, 5

D 5, 2, 4, 3, 1

**Answer:** D

**Explanation:**

Correct order in descending order :

= Annual (1 year) -> Biannual (6 months) -> Monthly (30 days) -> Fortnightly (15 days) -> Weekly (7 days)

≡ 5, 2, 4, 3, 1

=> Ans - (D)

**Question 172**

Which one set of letters when sequentially placed at the gaps in the given letter series shall complete it ?

a \_ cbc \_ ca \_ ab \_ bca \_ ab

A babcc

B bcabb

C abcbc

D bcabc

**Answer:** A

**Explanation:**

The Series is

abc,bca,cab,abc,bca,cab

So letters from option A when placed sequentially in gaps will complete the series.

## SSC CGL Previous Papers (DOWNLOAD PDF)

**Instructions**

In the following questions, a series is given, with one term missing. Choose the correct alternative from the given ones that will complete the series.

**Question 173**

BCFG JKNO, RSVW, ?

- A ZADE
- B HIKL
- C STUX
- D MNPQ

**Answer: A**

**Explanation:**

The Series follows the pattern

BCFG

$B+8, C+8, F+8, G+8 = JKNO$

$J+8, K+8, N+8, O+8 = RSVW$

$R+8, S+8, V+8, W+8 = ZADE$

**Question 174**

CIM, HNR, MSW, \_ ?

- A SXA
- B RXB
- C UYB
- D ZEH

**Answer: B**

**Explanation:**

The Series follows the pattern

First Term = CIM

Second term =  $C+5, I+5, M+5 = HNR$

Third term =  $H+5, N+5, R+5 = MSW$

Fourth Term =  $M+5, S+5, W+5 = RXB$

**Question 175**

2, 3, 6, 7, 14, 15, ?

- A 16
- B 30
- C 31
- D 32

**Answer: B**

**Explanation:**

There are two series in the question that start from 2 and 3 respectively

Series 1

2

$$2 + 2^2 = 6$$

$$6 + 2^3 = 14$$

$$14 + 2^4 = 30$$

Series 2

3

$$3 + 2^2 = 7$$
$$7 + 2^3 = 15$$

## SSC CGL Tier-2 Previous Papers PDF

### Question 176

3120, ?, 122, 23, 4

- A 488
- B 621
- C 610
- D 732

**Answer: B**

#### Explanation:

The Series follows the pattern

3120

$$(3120 - 15)/5 = 621$$

$$(621 - 11)/5 = 122$$

$$(122 - 7)/5 = 23$$

$$(23 - 3)/5 = 4$$

### Question 177

0, 5, 60, 615, ?

- A 6030
- B 6170
- C 6130
- D 6000

**Answer: B**

#### Explanation:

The Series follows the pattern

0

$$0 + 5 = 5$$

$$5 + 55 = 60$$

$$60 + 555 = 615$$

$$615 + 5555 = 6170$$

#### Instructions

For the following questions answer them individually

**Question 178**

Nitya is Sam's sister. Mogan is Sam's father. Selvan is Rajan's son. Rajan is Mogan's brother. How is Nitya related to Selvan ?

- A Daughter
- B Sister
- C Cousin
- D Wife

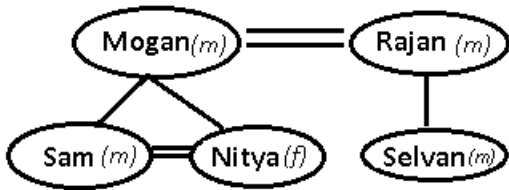

**Answer:** C

**Explanation:**

Nitya is Sam's sister and Mogan is Sam's father.

=> Mogan is the father of Sam and Nitya.

Rajan is Mogan's brother and Selvan is Rajan's son.

Thus, Nitya and Selvan are cousins.

=> Ans - (C)

**200 SSC Mocks for just Rs. 249 - Enroll now**

**Question 179**

A boy's age is one fourth of his father's age. The sum of the boy's age and his father's age is 35. What will be father's age after 8 years ?

- A 15
- B 28
- C 35
- D 36

**Answer:** D

**Explanation:**

Let father's age =  $4x$  years

=> Son's age =  $\frac{1}{4} \times 4x = x$  years

Thus, sum of their ages =  $4x + x = 35$

=>  $x = \frac{35}{5} = 7$

∴ Father's age after 8 years =  $4(7) + 8 = 36$  years

=> Ans - (D)

**Question 180**

A man said to a lady "Your mother's husband's sister is my aunt". How is the lady related to man ?

- A Sister
- B Mother
- C Daughter
- D Granddaughter

**Answer: A**

**Explanation:**

The lady's mother's husband's sister is that lady's aunt.

Now, according to ques, the man has also the same aunt.

Thus, they are both brothers and sisters.

=> Ans - (A)

**Question 181**

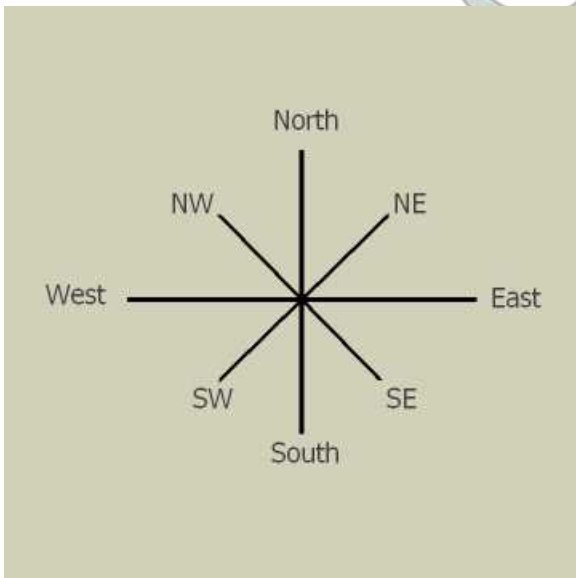

**If South East becomes North, then what will South West become ?**

- A North
- B West
- C East
- D North West

**Answer: C**

**Explanation:**

to solve this we must rotate the following diagram by 135 degrees ACW: then we get the new south west as EAST. therefore the correct answer is option C

## SSC CGL Important Questions PDF

**Question 182**

**From the given alternatives select the word which cannot be formed using the letters of the given word.**

**CONTENTION**

- A TONIC

- B NOTE
- C NATION
- D NOTION

**Answer: C**

**Explanation:**

From the given alternatives all words can be formed using the letters of the given word CONTENTION except for option C as there is no A which can be used in option C.

**Question 183**

in a certain code language, GRAPE is written as 27354 and FOUR is written as 1687. How is GROUP written in that code?

- A 27384
- B 27684
- C 27685
- D 27658

**Answer: C**

**Explanation:**

The codes for each letter is given.

Thus, G -> 2  
R -> 7  
O -> 6  
U -> 8  
P -> 5

=> GROUP is coded as **27685**

=> Ans - (C)

**Question 184**

WAYIN is written as TXVFK. How LBUK can be written in that code ?

- A IYRII
- B KATJ
- C JZSI
- D NDWM

**Answer: A**

**Explanation:**

on replacing every alphabet of the word WAYIN by the alphabet that is two positions above it in the list of Alphabets, we get TXVFK . on similar lines the word LBUK can be coded as IYRII , which is option A

## 1500 + Free Must Solved SSC Questions (With Solutions)

**Question 185**

In a certain code language, if the word PARTNER is coded as OZQSMDQ, then what is the code for the word SEGMENT ?

- A TFHNFOU

- B RFDLMS
- C RDELMS
- D RDFEDNS

**Answer: B**

**Explanation:**

on replacing every alphabet in PARTNER with the preceding one in the Alphabet we get OZQSMDO therefore, we can apply the same pattern to SEGMENT and the solution we get is RFDLMS.  
hence the correct answer is option B

**Question 186**

If DOCTOR is written as FQEVQT, how PATIENT can be written in that code ?

- A RVKGPV
- B RCKPGVV
- C RCVKGPV
- D RVCKGVP

**Answer: C**

**Explanation:**

on replacing every alphabet of DOCTOR with the next to next alphabet in the list we get FQEVQT .  
therefore the same can be applied to PATIENT and the resultant is RCVKGPV .

hence the correct answer is option C

**Instructions**

(3738) : In the following questions, find the missing number.

**Question 187**

21	24	36
11	14	12
3	?	4
77	112	108

- A 2
- B 4
- C 3
- D 5

**Answer: C**

**Explanation:**

The column follows the pattern

$$21 \times 11/3 = 77$$

$$36 \times 12/4 = 108$$

Similarly

$$24 \times 14/? = 112$$

$$24 \times 14/112 = ?$$

$$? = 3$$

## General Science Notes for SSC CGL

### Question 188

12	16	18
16	16	20
5	7	?
197	263	356

- A 9
- B -4
- C 4
- D -8

**Answer:** B

### Explanation:

The column follows the pattern

$$12 \times 16 + 5 = 197$$

$$16 \times 16 + 7 = 263$$

Similarly

$$18 \times 20 + ? = 356$$

$$360 + ? = 356$$

$$? = -4$$

### Instructions

For the following questions answer them individually

### Question 189

If + means  $\div$ , - means  $\times$ ,  $\times$  means +,  $\div$  means -, then  $90 + 18 - 6 \times 30 \div 4 = ?$

- A 64
- B 65
- C 56
- D 48

**Answer:** C

### Explanation:

symbols and their meanings are as follows:

+ means  $\div$

- means  $\times$

$\times$  means +

$\div$  means -

therefore the given statement " $90 + 18 - 6 \times 30 \div 4$ " will mean :

$90 \div 18 \times 6 + 30 - 4$ . which by applying BODMAS will be equal to:  $30 + 30 - 4 = 56$ .

the correct option is option C

**Question 190**

If  $73 + 46 = 42$  and  $95 + 87 = 57$ , then  $62 + 80 = ?$

- A 32
- B 48
- C 64
- D 36

**Answer:** D

**Explanation:**

The pattern followed is :

$$73 + 46 = 3[(7 - 3) + (4 + 6)] = 3 \times 14 = 42$$

$$\text{and } 95 + 87 = 3[(9 - 5) + (8 + 7)] = 3 \times 19 = 57$$

$$\text{Similarly, } 62 + 80 = 3[(6 - 2) + (8 + 0)] = 3 \times 12 = 36$$

=> Ans - (D)

**Free SSC Study Material (18,000 Solved Questions)**

**Question 191**

Based on the given data, estimate the number of 'Televisionbuyers' for the year 1990.

1982 1984 1986 1988 1990

447 458 489 540 ?

- A 611
- B 591
- C 571
- D 601

**Answer:** A

**Explanation:**

Number of television Buyers in 1982 = 447

Number of Television buyers in 1984 = 458 (447+11)

Number of Television buyers in 1986 = 489 (458+ 11 +20)

Number of Television buyers in 1988 = 540 (489 + 11 +20 +20 )

Number of Television buyers in 1990 = 611 (540 + 11 +20 +20 + 20 )

**Question 192**

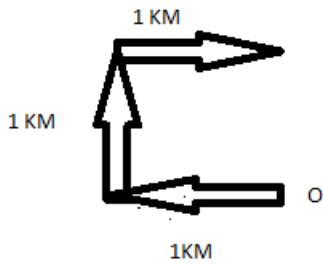

A man coming out of the backdoor of his house which is facing East, walked for one kilometre, turned to his right and walked for another kilometre. Then he turned to his right and walked a kilometre again. Where was he from his house at the end?

- A 1 km away in north
- B 1 km away in south
- C 1 kin away in east
- D 1 km away in west

**Answer:** A

**Explanation:**

let the starting point be O. he is facing west as it is the backdoor. now:

AS we can see he will be 1 km north of his original position.

hence the correct answer is option A

**Question 193**

Two squads of soldiers A and B, facing East and West respectively received the following commands - Left Turn, About Turn, Right Turn, Left Turn. Which directions would the squads A and B face at the end ?

- A East, West
- B West, East
- C North, South
- D South, North

**Answer: D**

**Explanation:**

since the two squads are facing opposite directions initially, therefore because they are given same commands they will end up facing opposite directions.

focusing on A's direction after each command.

initially: E

Left Turn: North

About Turn: South

Right Turn: West

Left Turn: South

therefore at the end B will end up facing North. hence the correct answer is option D

## SSC Exam Free Videos (Youtube)

**Instructions**

In the following questions, two statements are given, followed by two conclusions I and II. You have to consider the statements to be true even if they seem to be at variance from commonly known facts. You have to decide which of the given conclusions, if any, follow from the given statements.

**Question 194**

**Statements :**

1. Due to contamination of water, large number of people were admitted to hospital.
2. The symptoms were of Typhoid.

**Conclusions :**

- I. Contamination of water may lead to Typhoid.
- II. Typhoid is a contagious disease.

- A Only conclusion I is true
- B Only conclusion II is true
- C Both conclusions I and II are true
- D Both conclusions I and II are false

**Answer:** A

**Explanation:**

Contagious disease is spread from one person to another by direct contact. That typhoid is a contagious disease is not deductible from the given statements.

Thus, only conclusion I is true.

=> Ans - (A)

**Question 195**

**Statements :**

1. 60% of the government employees went on strike.
2. Mr. Gopal is a government employee.

**Conclusions :**

- I. Mr. Gopal went on strike.
- II. Mr. Gopal did not participate in the strike.

- A Only conclusion I follows
- B Only conclusion II follows
- C Both conclusions I and II follow
- D Either conclusion I or II follows

**Answer:** D

**Explanation:**

It is given in the statements that some of the government employees went on strike. Also, Since Mr. Gopal is a government employee, he either participated or did not participate in the strike.

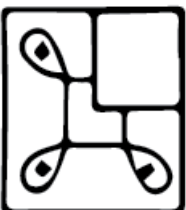

Thus, either conclusion I or II follows.

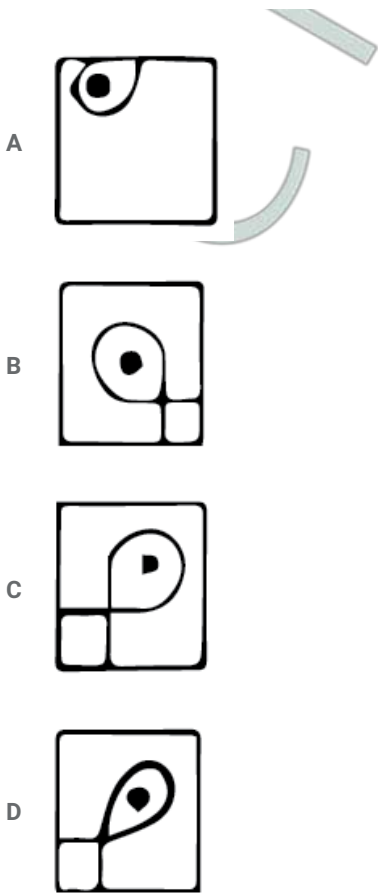

=> Ans - (D)

**Instructions**

For the following questions answer them individually

**Question 196**

Answer: D

**Explanation:**

To complete the above figure, we need a square with a balloon shape figure attached to its top right.

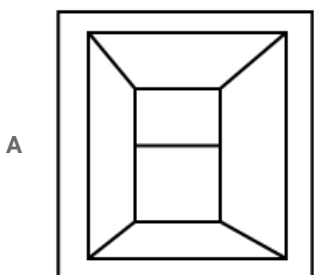

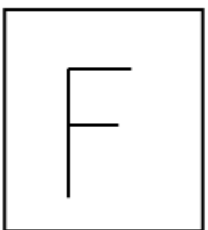

=> (A) and (B) are eliminated.

In option (C) the balloon is not a complete curve. Thus, it is also eliminated

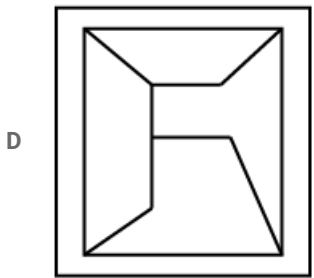

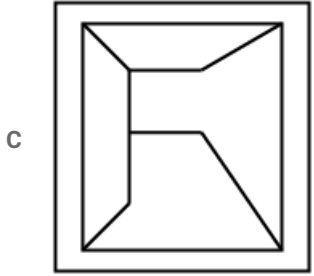

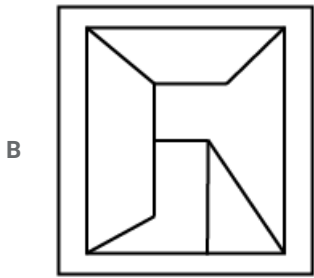

Ans - (D)

**SSC Free Preparation App**

**Question 197**

A

Answer: B

**Explanation:**

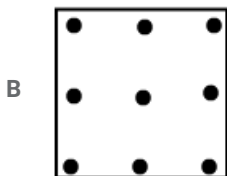

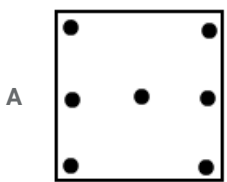

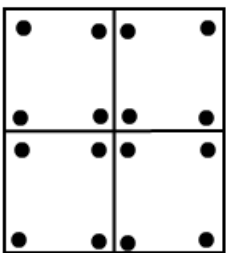

The given figure is a shape of 'F' in which the first horizontal line is slightly larger than the second horizontal line.

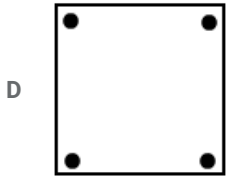

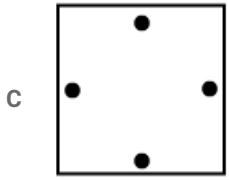

In options (A), (C) & (D), both the horizontal lines are of same length given in the middle of the figures.

Thus, these are eliminated

Ans - (B)

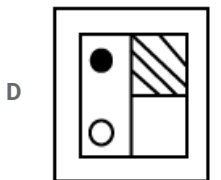

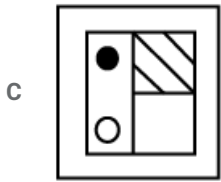

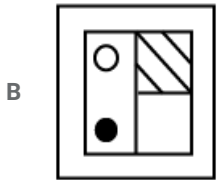

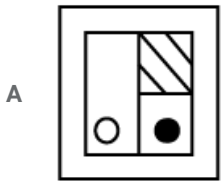

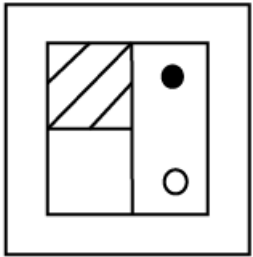

**Question 198**

Answer: D

Question 199

Answer: C

**Explanation:**

In the mirror image of the given figure, the black and white dots in the right side of image will be at the left side in the mirror in that order.

=> Thus, (A) and (B) are eliminated.

Now, in the top left box, there are 3 diagonal lines, thus, there will be 3 diagonal lines in top right in the mirror image and not 4 as given

in option (D)

=> (D) is also eliminated

Ans - (C)

## Daily Free SSC Practice Set

### Question 200

A word is represented by only one set of numbers as given in any one of the alternatives. The sets of numbers given in the alternatives are represented by two classes of alphabets as in two matrices given below. The columns and rows of Matrix I are numbered from 0 to 4 and that of Matrix II are numbered from 5 to 9. A letter from these matrices can be represented first by its row and next by its column, e.g., 'T.' can be represented by 13, 22, etc. and 'V' can be represented by 67, 76, etc. Similarly, you have to identify the set for the word SHRI.

Matrix I

	0	1	2	3	4
0	R	H	E	L	I
1	I	E	L	R	H
2	H	L	R	I	E
3	E	R	I	H	L
4	L	I	H	E	R

Matrix II

	5	6	7	8	9
5	B	S	N	A	D
6	D	N	B	S	A
7	A	B	D	N	S
8	S	D	A	B	N
9	N	A	S	D	B

A 58, 02, 13, 01

B 85, 42, 31, 14

C 68, 20, 13, 32

D 85, 02, 44, 30

Answer: C

#### Explanation:

(A) - 58, 02, 13, 01 = AERH

(B) - 85, 42, 31, 14 = SHRH

(C) - 68, 20, 13, 32 = **SHRI**

(D) - 85, 02, 44, 30 = SERE

=> Ans - (C)
