Fill in the blanks.

Question 1
Professionals focus their .......... on fulfilling their responsibilities and achieving results, not on .......... a particular image.

A leadership — attributing
B planning — devising
C abilities — contributing
D energies — portraying

Answer: D

MAT Free Solved Previous Papers

Question 2
When you are living with your .......... values and principles you can be straightforward, honest and ..........

A inherited — distinct
B core — up-front
C innate — durable
D cultural — perceptive

Answer: B

Question 3
In the role of a counsellor, you are an authority figure whose objective is to .......... attentively and sensitively to employees who .......... you with their feelings.

A manage — direct
B project — focus
C listen — trust
D concentrate — believe

Answer: C

Question 4
If a junior executive neglects his professional development and .......... education, he can easily and quickly become obsolete in a world changing at .......... rates.

A higher — vulnerable
B management — supreme
C better — supreme

Answer: A
Question 5
The political masters of the health care system have not listened to professional health planners because it **has not been profitable for them to do that thing**

A  has not been profitable for them to do so  
B  has not been profitable for them to do that thing  
C  has been unprofitable for them to do that thing  
D  has been unprofitable for them to do so  
Answer: A

Question 6
Most bacterial population grown in controlled conditions will quickly expand to limit the food supply, **produce toxic waste products that inhibit further growth, and reached an equilibrium state within a relatively short time**

A  will have produced toxic waste products that in habit further growth and also will reach and equilibrium state within a relatively short time  
B  produce toxic waste products that inhibit further growth, and reached and equilibrium state within a relatively short time  
C  will then produce a toxic waste product that inhibit further growth and thus reached an equilibrium state in a very short time  
D  produce toxic waste products that inhibit further growth and reach equilibrium  
Answer: D

Question 7
It could be argued that the most significant virtue of a popular democracy is not the right to participate in the selection of leaders, **but rather that it affirms** our importance in the scheme of things

A  but rather is affirmation of  
B  but rather that it affirms  
C  but rather it’s affirmation  
D  but instead of that, its affirming that  
Answer: B
Question 8

Long popular among the connoisseurs of Indian music, Ravi Shankar first impressed western listeners with his phenomenal technical virtuosity, but they soon came to appreciate his music as an artful expression of an older culture’s musical insight.

A  but it soon occurred that they appreciated his music as an artful
B  but they soon came to appreciate his music as an artful
C  but soon this was surpassed by an appreciation of it as an artful
D  which was soon surpassed by an even deeper appreciation of it as an artful

Answer: D

Instructions
Each question has a group of sentences marked A, B, C and D. Arrange these to form a logical sequence.

Question 9
A. We tend to see the similarity within a category as being more important, and the similarity between different categories as being less important, than either actually is.
B. Given a small amount of information about a person, we are ready to classify them as a member of a particular group, and then to infer all kinds of additional facts about them, as if all members of the group were the same in most respects.
C. Our tendency to classify and label everything can lead us into the error of seeing the world as made up of only those categories for which we have names.
D. Expecting too much of the descriptive power of language is itself a serious cause of distorted thinking

A  DCBA
B  DBAC
C  BDAC
D  BCDA

Answer: A

Question 10
A. Some of us, as a result, gain an overall impression of people as either all good or all bad, making further assumptions on this basis.
B. An example of the assumption some patients make that doctors with a good “bedside manner” are also more technically competent as others who do not relate as well to their patients.
C. This is what the psychologists refer to as halo effect.
D. We have a strong tendency of associate Positive attributes with other positive attributes and negative ones with each other.

A  DCBA
B  DABC
C  DBCA
D  DACB

Answer: B
Question 11
A. In the past, the customized tailoring units were localized to the township or city and catered exclusively to domestic demand
B. Traditionally, Indian preferred custom made clothing and the concept of ready to wear is a relatively recent one.
C. Consumer awareness of styling issues and the convenience afforded by ready to wear helped the RMG industry make small in roads into the domestic market in the 1980s.
D. The customized tailoring outfits have always been a major source of clothing for domestic market.

A  BDAC
B  BCDA
C  CDBA
D  DBAC

Answer: A

Question 12
A. Participation involves more than the formal sharing of decisions.
B. Through anticipation, individuals or organizations consider trends and make plans, shielding institutions from trauma of learning by shock.
C. Innovative learning involves both anticipation and participation.
D. It is an attitude characterized by the cooperation, dialogue and empathy.

A  ABCD
B  BCDA
C  CBAD
D  DABC

Answer: C

Instructions
Each of these questions has a Sentence with four alternatives. Choose the alternative which best conveys the content of the given sentence correctly.

Question 13
No officer had ought to be put into a situation where he has to choose between his love for his family and the responsibilities accompanying his duty.

A  No officer has ought to be put into a situation in which he has to choose between his love for his family and the responsibilities accompanying his duty
B  No officer had ought to be put into a situation where he has to choose between his love for his family and the responsibilities accompanying his duty
C  No officer should to be put into a situation where he has to choose between his love for his family and the responsibilities accompanying his duty
D  No officer ought to be put into a situation in which he has to choose between his love for his family and the responsibilities accompanying his duty

Question 14
Being a realist, the detective could not accept the statement of the accused that UFOs has caused the disturbance.

A Since he was a realist, the detective could not accept the statement of the accused that UFOs has caused the disturbance.

B Being a realist, the detective could not accept the statement of the accused that UFOs had caused the disturbances.

C Being that he was a realist, the detective could not accept the statement of the accused that UFOs had caused the disturbance.

D Realist that he was, the detective could not accept the statement of the accused that UFOs had caused the disturbance.

Answer: B

Question 15
Ever since the sting operation, there has been much Opposition from they who maintain that it was an unauthorised act.

A Ever since the sting operation, there has been much opposition from they who maintain that it has been an unauthorised act.

B Ever since the sting operation, there has been much opposition from they who maintain that it was an unauthorised act.

C Ever since the sting operation, there has been much Opposition from those who maintain that it was an unauthorised act.

D Ever since the sting operation, there has been much Opposition from those maintaining that it was an unauthorised act.

Answer: A

Question 16
The trend toward a decrease in the working hours is already evident in the longer weekend given to employees in many multinational organisations.

A The trend toward a decrease in the working hours is a ready evident in the longer weekend given to employees in many multinational organisations.

B The trend toward a decrease in the working hours is already evident in the longer weekend given to employees in many multinational organisations.

C The trend toward a decrease in the working hours is already evident in the longer weekend given to employees in many multinational organisations.

D The trend toward a decrease in the working hours is all in already evident in the longer weekend given to employees in many multinational organisations.

For the following questions answer them individually

**Question 17**

Many of the junk foods on the market today, doughnuts, burgers and pizza, have less nutrients than natural foods, which were dominant a decade or two ago. Many nutritionists claim that pizza and doughnuts give less nourishment than natural foods. A spokesman of a leading junk food company - pizza House - stated recently that an examination of grade school students shows less nutritional deficiency than in their parents’ time. Hence, foods are not as bad as made out to be. Which of the following, if true, would tend to strengthen the view of the spokesman ?

A  Fewer junk foods were available to the parents.
B  Grade school children reported eating no breakfast at all
C  Adults claim to eat junk foods as well as natural foods.
D  Both (a) and (c)

**Answer:** A

**Question 18**

Throughout the first decade of the 21st century, net increase in Indian direct investments in the Far East (funds outflows) exceeded net new Far East direct investment in India. Each of the following if true, could help to account for this trend except

A  Labour mobility was higher in India than in the Far East
B  Land values in the Far East were increasing at a faster rate than in India.
C  The cost of labour (wages) was consistently lower in the Far East than in India.
D  Corporate liquidity was lower in India than in the Far East

**Answer:** A

**Question 19**

Of the world’s largest AIDS cases countries in 2010, three had the same share of world AIDS patients as they had in 2000. These three countries may serve as examples of countries that succeeded in holding steady their share of the AIDS disease. Which of the following, if true, would most seriously undermine the idea that these countries serve as examples as described above?

A  Countries should strive to reduce their share of the total AIDS patients in the world, rather than try to hold it constant
B  Of the three countries two had a much larger share of world AIDS incidence in 2000 than in 2010
C  The three countries have different rates of population growth.
D  None of the above

**Answer:** A

**Free Gk Tests**
Question 20

The cost of housing in many urban parts of India has become so excessive that many young couples, with above-average salaries, can only afford small apartments. EMI and rent commitments are so huge that they can not consider the possibility of starting a family since a new baby would probably mean either the mother or father giving up a well paid position-something they can ill afford. The lack of or great cost of child-care facilities further precludes the return of both parents to work.

Which of the following adjustments could practically be made to the situation described above which would allow young couples to improve their housing prospects?

A  Encourage couples to have one child only
B  Encourage couples to remain child less
C  Encourage young couples to moveto cheaper areas for living.
D  None of these is likely to have an impact on the current situation.

Answer: C

Instructions

Read the passage to answer the questions that follows passage.

Passage I:

After President George W. Bush signed the United States - India Nuclear Cooperation Bill, he called up Prime Minister Manmohan Singh to tell him how pleased he was at this development. While welcoming this event, the Prime Minister took the opportunity to tell the President that there remained areas of concern that needed to be addressed during the negotiation of the bilateral agreement (called the 123 agreement, after the relevant clause number in the US Atomic Energy Act, 1954) The US has entered into some twenty-five 123 agreements with various countries, including the one concerning Tarapur. The Tarapur agreement concluded in 1963 was unique in that it guaranteed supplies of enriched uranium fuel from the US for running the Tarapur reactors for their entire life. However, after 1987 the US did not supply fuel saying its domestic legislation under the Nuclear Non-Proliferation Act prevented it from doing so. India argued that Tarapur was an inter-governmental agreement and hence had to be honoured by the US. Later, US allowed France to supply fuel to India. Subsequently, the USSR (now Russia) and even China supplied fuel for Tarapur. The lesson from the Tarapur episode is that U.S. breached with impunity even a cast iron guarantee it had furnished. Considerable bitterness grew between the U.S. and India and extended to many other areas beyond the nuclear one. When India agreed, reluctantly, in March 2006 to put imported reactors under “safeguards in perpetuity”, the US consented to the Indian insistence on assurances of fuel supply. This meant India could build up a stockpile of fuel to tide over disruption in supply and the US and Britain would arrange alternate supplies. The US would agree to work with other countries namely Russia, France, and Britain to arrange alternate supplies. The US legislation, based on the Hyde Bill, forbids India building up a stockpile of Nuclear fuel. It also obligates U.S. administration to work with other nuclear Supplier Group countries to get them to suspend supplies to India, if the U.S. has done so under some provision of the Hyde Bill. It is not evident how the U.S. can address the legitimate concerns of India on continued fuel supply, given the boundaries set by the Hyde Bill. With regard to future nuclear tests, the Prime Minister has said, India is only committed to a voluntary moratorium. A moratorium is only a temporary holding off of an activity, conditioned by specific circumstances obtained at the time when such a declaration was made. It can not be construed as a permanent ban. The Hyde Bill has sought to make the moratorium into a permanent ban. However, there is no such restraint imposed on the US, China, Pakistan or any other country. In bringing up this issue, I do not wish to suggest resumption of tests by India. But Indian can not prevent other countries from carrying out tests. It is, therefore, unacceptable that India forfeits its right to test for all time to come under the agreement with the US Even if the 123 agreement is silent on the issue, Indian negotiators must put this issue on the table. The Hyde Bill calls for suspension of all cooperation and fuel supplies and even calls for return of all equipment and materials supplies earlier in the event of test. It baffles one how India can return reactor installations that might have been operated a few years, were such a contingency to arise in future. The differences over the definition of “full civilian nuclear cooperation” have been discussed in the media. The Indian understanding was that reprocessing of spent fuel, enrichment of uranium, and production of heavy water also formed part of the term “full civilian nuclear cooperation.” In the congressional debate, it has been noted that these were construed by the US to be in the nature of military activities and not civilian. India’s future plans for thorium utilisation for civil nuclear power depend crucially on reprocessing. Similarly, civil nuclear power units using natural uranium require heavy water as reactor coolant and moderator. Equally if India were to embark on a sizeable light water reactor programme, it may like to have control on supply of enriched uranium for economic and supply security reasons. India has technologies of its own in these areas and will develop them further in the years ahead. If
the Indo-US agreement moves ahead in the manner its sponsors have speculated, in a few decades from now some 90 per cent of the nuclear installations in India would be open to International Atomic Energy Agency inspections. In that scenario, how can India reconcile to the embargo from nuclear advanced countries on the export of enrichment, reprocessing and heavy water technologies. Even if the issue were to be papered over now, it will then look from India’s point of view to have been a very bad bargain.

**Question 21**

What is the Indian understanding of the definition of “full civilian nuclear cooperation”?

A  Enrichment of uranium  
B  Reprocessing of spent fuel  
C  Production of heavy water  
D  All of the above  

**Answer:** D

**Question 22**

With reference to the passage, select which of the following statement(s) is/are incorrect?

A: US did not supply fuel to India after 1987.  
B: The Hyde bill calls for suspension of all cooperation and fuel supplies.  
C: India can prevent other countries from carrying out the test.

A  A and B  
B  B only  
C  A and C  
D  A, B and C  

**Answer:** D

**Daily Free Topic Test**

**Question 23**

What was the uniqueness of the Tarapur agreement that was concluded in 1963?

A  It guaranteed supplies of enriched uranium fuel from the US for running the Tarapur reactors for entire life  
B  It prevented other countries from carrying out nuclear tests  
C  It addresses the legitimate concerns of India on fuel supply  
D  All of the above  

**Answer:** A

**Question 24**

Which of the following countries supplied fuel for Tarapur?

A  France  
B  USA  
C  USSR and France
Not even a three-day brainstorming session among top psychologists at the Chinese University could unravel one of the world's greatest puzzles—how the Chinese mind ticks. Michael Bond had reason to pace the pavement of the Chinese University campus last week. The psychologist who co-ordinated and moderated a three-day seminar in Chinese psychology and most of the participants came a long way to knock heads. “If a bomb hits this building, muttered Bond, half-seriously, “it would wipe out the whole discipline.”

But the only thing that went off in the Cho Yiu Conference hall of Chinese University was the picking of brains, the pouring out of brains and a refrain from an ongoing mantra: “More work needs to be done” or “we don’t know.” Each of the 36 participants was allowed 30 minutes plus use of an overhead projector to condense years of research into data and theories. Their contents spilled over from 20 areas as of Chinese behavior, including reading, learning styles, psychopathology, social interaction personability and modernization.

An overriding question for observers, however, was: why, in this group of 21 Chinese and 15 non-Chinese, weren't there more professionals from mainland China presenting research on the indigenous people? Michael Philips, a psychiatrist who works in Hubei Province, explained: “The Cultural Revolution silenced and froze the research.”

Canadian-born doctor who has lived and worked in China for more than 10 years. “And 12 years later, research is under way but it is too early to do anything yet. Besides, most of the models being used are from the West anything.”

In such a specialised field, how can non-Chinese academics do research without possessing fluency in Chinese? These who cannot read, write or speak the language usually team up with Chinese colleagues. “In 10 years, we won’t be able to do this. It’s a money thing,” said William Gabrenya of the Florida Institute of Technology, who described himself as an illiterate Gweilo who lacks fluency in Chinese. Dr. Gabrenya raised questions such as why is research dependent on university students, why is research done on Chinese people in coastal cities (Singapore, Taiwan, Shanghai and Hong Kong) but not in land? “Chinese psychology is too much like European, too neat. He’s been dead a long time. How about the guy on a motorcycle in Taipei?”

Dr. Gabrenya said, urging that research have a more contemporary outlook. The academics came from Israel, Sweden, Taiwan, Singapore, United States, British Columbia and, of course, Hong Kong. Many of the visual aids they used by way of illustration contained eye-squinting type and cobweb-like graphs. One speaker, a sociologist from Illinois, even warned her colleagues that she would not give anyone enough time to digest the long, skinny columns of numbers. Is Chinese intelligence different from Western? For half of the audience who are illiterate in Chinese, Professor Jimmy Chan of HKU examined each of the Chinese characters for “intelligence.”

Phrases such as “a mind as fast as an arrow” and connections between strokes for sun and the moon were made. After his 25-minute speech, Chan and the group lamented that using Western tests are the only measure available to psychologists, who are starving for indigenous studies of Chinese by Chinese. How do Chinese children learn? David Kember of Hong Kong Polytechnic University zeroed in on deep learning versus surface. Deep is when the student is sincerely interested for his own reasons. Surface is memorizing and spitting out facts. It doesn’t nurture any deep understanding. If the language of instruction happens to be the children’s second language, students in Hong Kong have all sorts of challenges with English-speaking teachers from Australia, Britain and America with accents and colloquialisms.

Do Westerners have more self-esteem than Chinese? Dr. Leung Kwok, Chairman of the psychology department of Chinese University, points his finger at belief systems: The collectivist mind-set often stereotypes Chinese unfairly. The philosophy of “yuen” (a concept used to explain good and bad events which are pre-determined and out of the individual’s control) does not foster a positive self-concept. Neither do collectivist beliefs, such as sacrifice for the group, compromise and importance of using connections. “If a Chinese loses or fails, he has a stronger sense of responsibility. He tends to blame it on himself. A non-Chinese from the West may blame it on forces outside himself,” Dr. Leung said. By the end of the three-day session, there were as many questions raised as answered. It was agreed there was room for further research. To the layman, so much of the discussion was foreign and riddled with jargon and on-going references to studies and researchers. The work of the participants will resource in a forthcoming handbook of Chinese Psychology, which will be edited by Dr. Bond and published by Oxford University Press.

**Question 25**

**According to the passage the author suggests that**

A not many people study Chinese psychology

---

Question 26
It can be inferred from the passage that

A the Cultural Revolution was a productive period for Chinese psychology
B the Cultural Revolution was a dangerous period for Chinese psychology
C the Cultural Revolution was an unproductive period for Chinese psychology
D the Cultural Revolution was a new beginning for Chinese psychology

Answer: C

Question 27
According to the passage, William Gabrenya refers to himself as an ‘illirerate gweilo’. This suggests that

A he feels defensive about not speaking and reading Chinese
B he feels secure in his illiteracy
C he is representative of other Westerners active in this field
D he can operate perfectly well without learning Chinese

Answer: A

Question 28
According to the passage, all of the following are true except

A the visual aids were not very easy to understand
B the conference attracted a very professional standard of presentation
C the visual aids were not very tidy
D the presenters were under time pressure

Answer: B

Question 29
According to the passage which of the following is not true?

A Chinese characters are very difficult for Westerners to master
B It is difficult to come to a conclusion about Western and Chinese intelligence
It is difficult to measure Chinese intelligence with western tests.

More tests are required that are conducted by the Chinese for the Chinese.

Answer: A

Instructions
Read the passage to answer the questions that follows passage.

Passage III:

“Since wars begin in the minds of men,” so runs the historic UNESCO Preamble, “It is in the minds of men that the defences of peace must be constructed.” Wars erupt out when the minds of men are inflamed, when the human minds blinded and wounded, succumb to frustration and self-negation. Wars the transference of this self-negation into the other-negation. The three Indo-Pak wars and the persisting will to terrorise have emanated from this savage instinct of other-negation it is the legacy of the partition carnage and its still-bleeding and unhealed wound, Truncated from its eastern wing in 1971, Pakistan ever since has suffered from a sense of total existential self-negation. Plus the scars left by the two previously lost wars to India and Kargil fill the Army and the Pakistan psyche with a seething urge to revenge: that Indian has to be negated, destroyed — in a deep psychological sense, another Hiroshima in the subcontinent is imaginable and possible. Terrorism in Kashmir springs from such deep negating existential grounds. Like the former Soviet Union, Pakistan came into being as a result of a grand delusion and massive perversion of reality — the so-called two-nation theory. Like the former Soviet Union, it stand in danger of crumbling unless it modifies its reality perception and come to terms with its post-Bangladesh identity within the prevailing subcontinental equation. Failing this, Pakistan is bound to break up, nudging the region to a nuclear nightmare, including, possible South Asian Hiroshimas. With ‘hot pursuits’ and ‘surgical operations’ freely making rounds amongst the policy elite and the public at large, the national atmosphere looks ominously charged. “On the brink,” headlines The Week adding, “As men and machines are quickly positioned by India and Pakistan, the threat of war looms real.” To which Gen. Musharraf counters, “If any war is thrust on Pakistan, Pakistan’s armed forces and the 140 million people of Pakistan are fully prepared to face all consequences with all their might.” According to Indian Express, “Pakistan has deployed medium range ballistic missile batteries (MRBBs) along the Line of Control (LOC) near Jammu and Poonch sectors in an action that will further escalate the tension between the two countries.” And India’s Defence Minister ups the ante, “We could take a (nuclear) strike, survive and then hit back, Pakistan would be finished.” (Hindustan Times, December 30, 2001). Mr. Fernandes’s formulation is certainly a tactical super shot, even a strategical super hit in as much as this is the very logic of India’s ‘No-first-stike’ doctrine. The Defence Minister obviously has no idea of the ethical, phenomenal logical implications of abandoning chunks of the Indian population to ransom for potential Hiroshimas and then ‘finishing’ the neighbouring country of 140 in what could be nothing short of an Armageddon. Forget these horrendous scenarios. But does this not repudiate the grain of truth for which India’s civilisation stood for and vindicated across the untold millennia of its history? Yet, Mr. Fernandes, the pacifist and Gandhian, is no warmonger. As Defence Minister he had to react at a level with the Pakistanis, with their proclivity to drop the nuclear speak whenever that suited them, could have.

Question 30
According to the passage, Pakistan is bound to disintegrate I. and it will throw the subcontinent into a nuclear backlash. II. if it refuses to accept its present identity. III. if it does not stop fuelling terrorism in Kashmir.

A II and III are correct
B I, II and III are correct
C I and II are correct
D I and III are correct

Answer: C

Question 31
It can be inferred from the passage that
A Soviet Union crumbled as a result of the grand delusion of the two nation theory
B Soviet Union also came into being as a result of the two nation theory
C Soviet Union's disintegration was due to her failure to accept the reality
D The ideological basis of creation of Soviet Union and Pakistan was the same
   Answer: C

**Question 32**

According to the passage, the reason for terrorism in Kashmir is

A Pakistan’s perception of two-nation theory
B Pakistan’s blind faith in terrorism
C Pakistan's sense of self-negation
D Both (b) and (c)

Answer: C

**Question 33**

According to the passage, all of the following about the defence minister are not true, except

A He is not a Gandhian
B He is not logical
C He is a pacifist
D He is not a warmonger

Answer: C

**Instructions**

Read the passage to answer the questions that follow passage.

**Passage IV:**

Mobility of capital has given an unprecedented leverage to companies not only to seek low paid, informal wage employees across national boundaries, but the threat of capital flight can also serve to drive down wages and place large numbers of workers in insecure, irregular employment. Informalisation strategies enable employers to draw on the existing pool of labour as and when they require, without having to make a commitment to provide permanent employment of any of the employee-supporting benefits associated with permanent jobs. As far as the working class is concerned, informalisation is in fact, a double-edged sword. For not only is the employee denied the rights associated with permanent employment, but the nature of casual work essentially destroys the foundations of working-class organisation. As workmen move from one employer to another, numbers are scattered, everyday interests become divergent, and individualized survival takes precedence over group or collective struggles. Even workers who have been in sectors with a long tradition of unionization are difficult to organise once they are removed from the arena of permanent employment. About 50,000 textile mill workers in Ahmedabad city were laid off during the late 1980s and early 1990s. The move to obtain compensation and rehabilitation for these workers floundered on the weakness of the struggle, as numbers of workers who were available for pressing their claims and taking to some kind of activism dwindled, the motivation of leaders declined and the struggle slowly frittered away. If this is the situation with workers familiar with the concept of unionisation, the task of organising vast masses of casual workers who have never been organised, is obviously much more difficult. The problem, essentially, is not only...
that of organising workers for struggle, but given the wansitory nature of casual employment, employers are not bound
to provide insurance of any kind, and frequently, there is no fixed employer against whom workers’ claims can be
pressed. In this context, the formation of the National Centre for Labour (NCL) can be seen as a landmark in the history
of the working class movement in India. The NCL is an apex body of independent trade unions working in the
unorganised sector of labour, registered under the Indian Trade Union Act, 1926. Through its constituent members, the
NCL represents the interests of workers in construction, agriculture, fisheries, forests, marble and granite
manufacturing, self-employed workmen, contract workers, anganwadi and domestic workers, as also in the tiny and small-scale industries. The NCL, launched in 1995, has about 6,25,000 members spread over 10 states in India. The NCL reflects two tendencies. First, the formation of such a federation highlights that despite the problems in
organising workers in the informal sector, there have in fact, been a rage of organisations which have sought to
address these issues. On a collective plane, their activities represent a marked departure from the traditional way of
conceptualising union activities exclusively around organised or formal sector workers. Thus, the unionisation of the
hitherto unorganized sector has become inserted into the political universe as a possible and legitimate activity.
Second formation of the NCL, to an extent, overturns the pessimistic logic that the interests of the unorganised sector—
given their divers and inchoate form — cannot be articulated from a single platform. For the NCL aims precisely, do not
only provide an anchoring for these diverse organisations, but more importantly, to articulate the need for
institutionalised norms of welfare which can apply to the unorganised sector as a whole. It is in the context of this
generalised movement that one needs to view recent efforts to bring in legislative acts which seek to create a new
framework of laws and institutions addressing the needs of the unorganised sector. One of the major problems that has
dogged this sector has of course been that of implementation. Thus, for example, while there is a stimulated minimum
wages for most industries, this is frequently flouted by employers, a central objective of the NCL has been to advocate
legislation to create agencies, which would mediate between the employer and the employee, to institutionalise
certain guarantees of welfare and security to the employee. Thus, for example, the State Assisted Scheme of Provident
Fund for Unorganised Workers, 2000 proposed by the Labour Department of the Government of West Bengal,
introduces the mechanism of a Fund which will contributed to by the worker (wage-earner or self-employed person),
the employer, and the Government and to which the worker would be entitled at the age of 55 or above. By registering
a worker to this programme and issuing an identity card, the initial hurdle of identifying a large mass of scattered
workers is overcome and a step is taken towards institutionalising their legitimate claim against the employers and
from the state. The Karnataka Unorganised Workers (Regulation of employment and Conditions of Work) Bill, 2001,
offers a more comprehensive framework for addressing the unorganised sector’s needs. It envisages the formation of a
fund and a Board, in each sector. The Board, consisting of members from the Government, employers and employees,
would be responsible for administering the Fund. Employers must compulsorily pay towards the Fund, a certain fixed
percentage of the wages or taxes payable by them, or a certain percentage of the cost of their project, (for example, in
construction projects). The concept of the Fund is designed to create the financial viability of social security for
workers, and to provide a structure for employers’ contribution. Thus, workers would be insured for accident and
illness, old age and to unemployment. The Board, is designed to provide a mechanism to ensure the working of the
Fund, and essentially, to institutionalise workers’ claims against employers through an empowered agency. In the
broader context of economic liberalization, recently proposed labour reforms seek to extend the scope of contract
employment and to facilitate worker lay-off. As casualisation of labour now seems an irreversible trend, the Bills
outlined above would appear to be the only way to ensure workers’ interest. To this extent, organizations such as the
NCL, which have systematically struggled to push for such legislation, are serving can invaluable historical purpose. As
the Karnataka Unorganised Workers Bill awaits endorsement during the Assembly sessions being held currently for the
protagonists of the movement, this would be a watershed, but, nevertheless only a moment on a struggle that needs to
be waged at multiple points and to evolve to newer heights.

**Question 34**

According to the passage, the Proposed labour reforms

A. will provide a much needed thrust to liberalization
B. will encourage the practice of hiring labourers on a contract basis
C. have resulted in casualisation of labour
D. seek to extend the scope of employment and to facilitate worker retrenchment

**Answer:** C

Question 35
According to the Passage, textile mill workers could not obtain compensation because

A  the number of workers available for pressing their claims was not adequate
B  they were not united
C  of the weak ness of the struggle
D  the motivation of the leaders was very low

Answer: C

Question 36
According to the passage, the I most important aspect of the NCL is that

A  it has given a voice to the interests of workers in the unorganized sector
B  it is an apex body of independent trade unions
C  it has 6,25,000 members spread over 10 states in India
D  it is the only baby of its kind in India

Answer: A

Instructions
Each of these questions has four underlined parts, Identify the part which is not correct

Question 37
No sooner he left office/(a) then it started/(b) raining heavily/(c) nough to make him completly wet/(d)

A  (a)
B  (b)
C  (c)
D  (d)

Answer: A

MAT Free Solved Previous Papers

Question 38
Even after hearing the leader/(a) for a long time/(b) the followers could not make out/(c) which was talking about/(d)

A  (a)
B  (b)
C  (c)
D  (d)

Answer: D
Question 39
The principal, along with the teachers/(a) were seen boarding a bus/(b) to go to a picnic/(c) on national holiday/(d)

A (a)
B (b)
C (c)
D (d)

Answer: B

Question 40
With the introduction of the new syllabus/(a) the number of colleges reporting/(b) high results are decreasing/(c) year after year/(d)

A (a)
B (b)
C (c)
D (d)

Answer: C

Question 41
A man received Rs. 12000 as Puja Bonus. He invested a part of it at 5% per annum and the remaining at 6% per annum, simple interest being allowed in each case. The total interest earned by him in 4 years is Rs. 2580. The sum invested at 5% per annum is

A Rs. 4500
B Rs. 4000
C Rs. 7500
D Rs. 8000

Answer: C

Free Gk Tests

Question 42
A finance company declares that, at a certain compound interest rate, a sum of money deposited by anyone will become 8 times in three years. If the same amount is deposited at the same compound rate of interest, then in how many years will it become 16 times?
A 5 years
B 4 years
C 6 years
D 7 years
Answer: B

Question 43
In an examination, a pupil's average marks were 63 per paper. If he had obtained 20 more marks for his Geography paper and 2 more marks for his History paper, his average per paper would have been 65. How many papers were there in the examination?

A 9
B 8
C 10
D 11
Answer: D

Question 44
A boat man rows to a place 45 km distant and back in 20 hours. He finds that he can row 12 km with the stream in the same time as 4 km against the stream. Find the speed of the stream.

A 3 km/h
B 2.5 km/h
C 4 km/h
D Cannot be determined
Answer: A

Daily Free Topic Test

Question 45
Two cyclists start on a circular track from a given point but in opposite directions with speeds of 7 m/s and 8 m/sec respectively. If the circumference of the circle is 300 m, after what time will they meet at the starting point?

A 100 s
B 20 s
C 300 s
D 200 s
Answer: C
Question 46
In an objective examination of 90 questions, 5 marks are allotted for every correct answer and 2 marks are deducted for every wrong answer. After attempting all the 90 questions, a student got a total of 387 marks. Find the number of questions that he attempted wrong.

A 36
B 18
C 9
D 27
Answer: C

Question 47
Ram went to shop to buy 50 kg of rice. He buys two kinds of rice which cost him Rs. 4.50 per kg and Rs. 5.00 per kg. He spends a total of Rs. 240. What was the quantity of rice bought which cost him Rs. 4.50 per kg?

A 25 kg
B 30 kg
C 20 kg
D None of the above
Answer: C

MAT Free Solved Previous Papers

Question 48
Seema invested an amount of Rs 16,000 for two years on compound interest and received an amount of Rs 17,640 on maturity. What is the rate of interest?

A 5 pcpa
B 8 pcpa
C 4 pcpa
D Data inadequate
Answer: A

Question 49
My Scooty gives an average of 40 km/L of petrol. But after recent filling at the new petrol pump, its average dropped to 38 km/L. I investigated and found out that it was due to adulterated petrol. Petrol pump add Kerosene, which is \( \frac{2}{3} \) cheaper than petrol, to increase their profits. Kerosene generates excessive smoke and knocking and gives an average of 18 km per 900 ml. If I paid Rs. 30 for a liter of petrol, what was the additional amount the pump-owner was making?

A Rs. 1.75
B Rs. 1.80

Downloaded from cracku.in
Question 50
A train after travelling 150 km meets with an accident and then proceeds at \( \frac{3}{5} \) km of its former speed arrives at its destination 8 hours late. Had the accident occurred 360 km further, it would have reached the destination 4 hours late. What is the total distance travelled by the train?

A 960 km
B 870 km
C 840 km
D 1100 km
Answer: B

Question 51
In an engineering college the average salary of all engineering graduates from Mechanical trade is Rs 2.45 lacs per annum and that of the engineering graduates from Electronics trade is Rs 3.56 lacs per annum. The average salary of all Mechanical and Electronics graduates is Rs 3.12 lacs per annum. Find the least number of Electronics graduates passing out from this institute.

A 43
B 59
C 67
D Cannot be determined
Answer: C

Question 52
There are two identical vessels X and Y. is filled with water to the brim and X is empty. There are two pails A and B, such that B can hold half as much water as A. One operation is said to be executed when water is transferred from Y to X using A once and water is transferred to Y from X using B once. If A can hold \( \frac{2}{3} \) liter of water and it takes 40 operations to equate the water level in X and Y, what is the total volume of water in the system?

A 20 L
B 10 L
C 40 L
D \( 20\frac{3}{4} \) L
Answer: C
Question 53
In a class with a certain number of students, if one student weighing 50 kg is added then the average weight of the class increases by 1 kg. If one more student weighing 50 kg is added then the average weight of the class increases by 1.5 kg over the original average. What is the original average weight (in kg) of the class?

A  4
B  46
C  2
D  47

Answer: D

Free Gk Tests

Question 54
The average monthly salary of employees, consisting of officers and workers, of an organisation is Rs 3,000. The average salary of an officer is Rs 10,000 while that of a worker is Rs 2,000 per month. If there are total 400 employees in the organisation, find the number of officers

A  60
B  50
C  80
D  40

Answer: B

Question 55
Two vessels contain mixtures of milk and water in the ratio of 8 : 1 and 1 : 5 respectively. The contents of both of these are mixed in a specific ratio into a third vessel. How much mixture must be drawn from the second vessel to fill the third vessel (capacity 26 gallons) completely in order that the resulting mixture may be half milk and half water?

A  12 gallons
B  14 gallons
C  10 gallons
D  13 gallons

Answer: B

Question 56
A man can row 4.5 km/h in still water and he finds that it takes him twice as long to row up as to row down the river. Find the rate of the Stream.

A  1.5 km/h
B  2 km/h
C  2.5 km/h
Question 57
The work done by a woman in 8 hours is equal to the work done by a man in 6 hours and by a boy in 12 hours. If working 6 hours per day 9 men can complete a work in 6 days, then in how many days can 12 men, 12 women and 12 boys together finish the same work, working 8 hours per day?

A 3 days
B 1 1/2 days
C 3 days
D 1 1/2 days

Answer: D

Question 58
A team of workers was employed by a contractor who undertook to finish 360 pieces of an article in a certain number of days, making four more pieces per day than was planned, they could complete the job a day ahead of schedule. How many days did they take to complete the job?

A 10 days
B 8 days
C 9 days
D 12 days

Answer: A

Question 59
Rahul can row a certain distance downstream in 6 hours and return the same distance in 9 hours. If the speed of Rahul in still water is 12 km/h, find the speed of the stream.

A 2 km/h
B 2.4 km/h
C 3 km/h
D Data inadequate

Answer: B
Question 60
Large, medium and small ships are used to bring water. 4 large ships carry as much water as 7 small ships. 3 medium ships carry the same amount of water as 2 large ships and 1 small ship, 15 large, 7 medium and 14 small ships, each made 36 journeys and brought a certain quantity of water. In how many journeys would 12 large, 14 medium and 21 small ships bring the same quantity?

A 32
B 25
C 29
D 49

Answer: C

Question 61
A train 300 m long is running at a speed of 90 km/h. How many seconds will it take to cross a 200 m long train running in the opposite direction at a speed of 60 km/h?

A $\frac{1}{75}$
B 60
C 12
D 20

Answer: C

Question 62
Out of eight crew members three particular members can sit only on the left side. Another two particular members can sit only on the right side. Find the number of ways in which the crew can be arranged so that four men can sit on each side.

A 864
B 865
C 863
D 1728

Answer: D

Question 63
Three pipes are made of different shapes. The cross-sections of the pipes are an equilateral triangle, a hexagon and a circle. The perimeter of each of these cross-sections is equal. The flow through the pipes is proportional to the area of cross-section. If it takes 8 min for the triangular pipe to fill up the tank, what will be the difference in the times taken by the hexagonal and circular pipes?

A 45 s
B 1 min

Question 64
An iron cube of size 10 cm is hammered into a rectangular sheet of thickness 0.5 cm. If the sides of the sheet be in the ratio 1 : 5, then the sides are

A 20 cm, 100 cm
B 10 cm, 50 cm
C 40 cm, 200 cm
D None of the above
Answer: A

Question 65
A portion of a 30 m long tree is broken by a tornado and the top strikes the ground making an angle of $30^\circ$ with the ground level. The height of the point where the tree is broken is equal to:

A 10 m
B $\frac{30}{\sqrt{3}}$ m
C $34\sqrt{3}$ m
D 60 m
Answer: A

Free Gk Tests

Question 66
Fresh grapes contain 80 percent water while dry grapes contain 10 percent water. If the weight of dry grapes is 250 kg what was its total weight when it was fresh?

A 1000 kg
B 1125 kg
C 1225 kg
D 1100 kg
Answer: B

Question 67
A dealer buys dry fruit at the rate of Rs 100, Rs 80 and Rs 60 per kg. He bought them in the ratio 12 : 15 : 20 by weight. He in total gets 20% profit by selling the first two and at last he finds he has no gain no loss in selling the whole quantity which he had. What was the percentage loss he suffered for the third quantity?

A 40%
Question 68

A man sitting in a train travelling at the rate of 50 km/h observes that it takes 9 s for a goods train travelling in the opposite direction to pass him. If the goods train is 187.5 m long, find its speed.

A 40 km/h
B 25 km/h
C 35 km/h
D 36 km/h

Answer: B

Daily Free Topic Test

Question 69

Amit Kumar got a 4-digit pass code (which is formed out of the digits 0, 1, 2, 3, 4, 5, 6, 7, 8, 9) of his ATM card from ICICI Bank. But after the 50th day he lost the pass code and also forgot the number. How many maximum number of trials may he have to take to get the right number? 0 can be the beginning of the code number.

A 10!
B 10^4
C 9^4
D 9!

Answer: B

Question 70

The length of a ladder is exactly equal to the height of the wall it is leaning against. If the lower end of the ladder is kept on a stool of height 3 m and the stool is kept 9 m away from the wall, the upper end of the ladder coincides with the top of the wall. Then the height of the wall is

A 15 m
B 12 m
C 18 m
D 11 m

Answer: A

Question 71

If three equal cubes are placed adjacent in a row, then the ratio of the total surface area of the new cuboid to that of the sum of the surface areas of the three cubes will be
MAT Free Solved Previous Papers

Question 72
The Qutab Minar casts a shadow 150 m long at the same time when the Vikas Minar casts a shadow 120 m long on the ground. If the height of the Vikas Minar is 80 m, find the height of the Qutab Minar.

A 100 m  
B 180 m  
C 150 m  
D 120 m  
Answer: A

Question 73
Due to global recession starting in January, Ram’s monthly salary of Rs 80,000 was cut by 10%. The monthly expenses which were Rs 6000, increased at the rate of 5% per month. Since which month will he have no savings if the recession lasted for a year?

A April  
B March  
C May  
D June  
Answer: A

Question 74
An oil refinery takes 100 L of crude oil as input and after refining for 1 hour gives certain amount of output oil X litres. This can be sold in the market at a profit of Rs 30/L. If this oil is further refined for \( \frac{1}{2} \) hour it gives oil Y litre. This can be sold at a profit of Rs. 50/L. Output and input ratio at both the stages is 90%. The maximum amount that can't be earned from 1000 L of crude input is

A Rs 30,000  
B Rs 27,000  
C Rs 40,000  
D Rs 40,500  
Answer: D
Question 75
The radius of a cylindrical cistern is 10 m and its height is 15 m. Initially the cistern is empty. We start filling the cistern with water through a pipe whose diameter is 50 cm. Water is coming out of the pipe with a velocity of 5 m/s. How many minutes will it take in filling the cistern with water?

A 20
B 70
C 60
D 80

Answer: D

Question 76
If $m$ and $n$ are natural number such that $2^m = 2^n = 960$, what is the value of $m$?

A 10
B 12
C 16
D Cannot determined

Answer: A

Question 77
If an angle of a triangle remain unchanged but each of its two including sides is doubled then by what factor does the area get multiplied?

A 2
B 3
C 4
D 5

Answer: C

Free Gk Tests

Question 78
A number when divided by 765 leaves a remainder 42. What will be the remainder if the number is divided by 17?

A 8
B 7
C 6
Question 79
If 11, 109, 999 is divided by 1111, then what is the remainder?

A 1098
B 11888
C 1010
D 1110

Answer: D

Question 80
A mixture (40 L) contains coniac and water in the ratio 3 : 1. To make the ratio 5 : 2. How much additional amount of water is required?

A 5 L
B 1 L
C 3 L
D 2 L

Answer: D

Daily Free Topic Test
Data Analysis & Sufficiency

Instructions
Answer these based on the figure which represents the flow of natural gas through pipelines across major cities A, B, C, D and (in suitable units). Assume, that supply equals demand.

Question 81
What is the number of units demanded in B?

A 400
B 350
C 450
Question 82
If the number of units demanded in C is 225, what is the value of M?

A 875  
B 1075  
C 775  
D 850  
Answer: B

Question 83
If the total demand in F is 80% of the demand in A, what is the demand in A?

A 2400  
B 2500  
C 4500  
D None of these  
Answer: B

Instructions
Answer these questions based on the information provided in the tables.

Question 88
In 2003-04, the ratio of the difference between the maximum and the minimum production of polyethylene, to the difference between the maximum and minimum production of polypropylene, is nearly

A 15
B 14
C 16
D 18

Answer: D

Question 89
The ratio of the maximum production of polyethylene in 2004-05 to the minimum production of polyethylene in 2003-04 is

A 5
B 4.8
C 5.4
D 4.2

Answer: A

Question 90
The maximum number of times the production in 2003-04 equals the production in 2004-05 is for which product?

A Polyethylene
B Polypropylene
Question 91
For polyethylene, the production in 2003-05 is, greater than the production in 2004-05 for how many months?

A 5
B 8
C 10
D 9
Answer: D

Question 92
The difference between the minimum production of polypropylene in 2004-05 and the minimum production of difference in July’s production of polyethylene of the two years?

A 2 times
B 3 times
C equal
D 0.4 times
Answer: D

Question 93
The two years when the capacities were augmented in all the sectors are

Answer: A

None of these

Answer: A
A 1993 and 1998
B 1990 and 1991
C 1993 and 1996
D 1990 and 2000

Answer: A

**MAT Free Solved Previous Papers**

**Question 94**
The percentage increase in hydel capacity over that of the previous year was maximum in

A 1997
B 1991
C 1999
D 1995

Answer: D

**Question 95**
In 2000, the percentage share of nuclear power in the total power capacity installed was approximately?

A 10.0
B 2.59
C 5.42
D 1.11

Answer: B

**Question 96**
If the total power generated in thermal units be 40% of the installed capacity, in hydel units be 50% of the installed capacity and in nuclear be 90% of the installed capacity, the total power generation in 1998 would be

A 19835 MW
B 11900 MW
C 5015 MW
D 22100 MW

Answer: B

**Download Excellent App for MAT Preparation**

**Question 97**
In 1990, the percentage share of thermal intotal installed capacity was approximately
Question 98
The growth in the installed thermal capacity between 1991 and 1999 was approximately.

A 51%
B 130%
C 92%
D 83%
Answer: D

Instructions
For the following questions answer them individually.

Question 99
From a point, Rajneesh started walking towards east and walked 35 m. He then turned towards his right and walked 20 m and he again turned right and walked 35 m. Finally he turned to his left and walked 20 m and he reached his destination. Now, how far is he from his starting point?

A 55 m
B 50 m
C 20 m
D 40 m
Answer: D

Free Gk Tests

Question 100
Rama remembers that she met her brother on Saturday, which was after the 20th day of a particular month. If the 1st day of that month was Tuesday, then on which date did Rama meet her brother?

A 24th
B 23rd
C 25th
D None of these
Answer: D
Question 101
Introducing Rajesh, Neha said, his brother's father is the only son of my grandfather. How is Neha related to Rajesh?

A  Daughter
B  Sister
C  Mother
D  Niece

Answer: B

Question 102
A directional post is erected on a crossing. In an accident, it was turned in such a way that the arrow which was first showing east is now showing south. A passer-by went in a wrong direction thinking it is west. In which direction is he actually travelling now?

A  North
B  South
C  East
D  West

Answer: A

Daily Free Topic Test

Question 103
Ram's age was square of number last year and it will be cube of a number next year. How long must he wait before his age is again the cube of a number?

A  10 years
B  39 years
C  38 years
D  64 years

Answer: C

Question 104
An office has as many four-legged chairs and as many four-legged tables as workers, and as many three-legged stools as four-legged almirahs. If the number of stools be one more than the number of workers and the total number of legs be 585, the number of workers in the office are?

A  17
B  34
C  16
D  Cannot be determined
Question 105
A, B, C and D play a game of cards. A says to B, ‘If give you 8 cards, you will have as many as C has and I shall have 3 less than what C has. Also if I take 6 cards from C, I shall have twice as many as D has’. If B and D together have 50 cards, how many cards has A got?

A 27
B 23
C 37
D 40

Answer: D

Question 106
After a get-together every person present shakes the hand of every other person. If there were 105 hand shakes in all, how many persons were present in the party?

A 14
B 13
C 15
D 16

Answer: C

Question 107
In a queue I am the last person while my friend is seventh from the front. If the person exactly between me and my friend is on the 23rd position from the front, what is my position in the queue?

A 37
B 36
C 38
D 39

Answer: D

Question 108
A cube is to be coloured in such a way as to avoid the same colour on adjacent surface. What is the minimum number of colours you will require?

A Four
B Three
C Six
D Nine

Answer: D
Question 109
There are eight poets A, B, C, D, E, F, G, and H. A, B, C and D are medieval poets whereas E, F, G and H are modern poets. Questions on modern poets and medieval poets are set in the question paper every alternate year. Among the modern poets, question-setters who like E also like F and those who like G also like H. The question-setter has written a book on F and so he does not like to ask any question on F. Last year there was a question on A. On which poet will be the probable question this year?

A  F
B  E
C  D
D  C
Answer: B

Question 110
There are five books A, B, C, D and E. Book C lies above D, Book E is below A; D is above A; B is below E. Which is at the bottom?

A  B
B  E
C  A
D  C
Answer: A

Question 111
A one-rupee coin is placed on plain paper. How many coins of the same size can be placed round it so that each one touches the central and adjacent coins?

A  3
B  4
C  7
D  6
Answer: D
