Read the following passage carefully and answer the questions given below it. Certain words are given in bold to help you to locate them while answering some of the questions.

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are **holding out** that in the near future they might be successful in achieving this **feat**. They have, however, acquired the ability in manipulating tissue cells. However, genetic misinformation can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be **abused** and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be **squarely** blamed though this **charge** has often been levelled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K. and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world.

A Rs. 501.50

B Rs. 499.20

C Rs. 495

D Rs. 510

Question 135

The owner of an electronics shop charges his customer 22% more than the cost price. If a customer paid Rs. 10,980 for a DVD player, then what was the cost price of the DVD player?

A Rs. 8,000

B Rs. 8,800

C Rs. 9,500

D Rs. 9,200

E None of these

Answer: E

Explanation:

Let CP of DVD player = Rs. $100x$

Question 137

In an examination it is required to get 40% of the aggregate marks to pass. A student gets 261 marks and is declared failed by 4% marks. What are the maximum aggregate marks a student can get?

- A 700
- B 730
- C 745
- D 765
- E None of these

Answer: E

Explanation:

Let the max aggregate marks = $100x$

The student gets 4% less than 40% = 36%

$$\Rightarrow \frac{36}{100} \times 100x = 261$$

$$\Rightarrow x = \frac{261}{36} = 7.25$$

\therefore Total marks = $100 * 7.25 = 725$

Question 138

A, B, and C divide an amount of Rs. 4,200 amongst themselves in the ratio of 7 : 8 : 6 respectively. If an amount of Rs. 200 is added to each of their shares, what will be the new respective ratio of their shares of amount?

- A 8 : 9 : 6
- B 7 : 9 : 5
- C 7 : 8 : 6
- D 8 : 9 : 7
- E None of these

Answer: D

Explanation:

Ratio of amounts received by A, B and C = 7 : 8 : 6

Sum of ratios = 7 + 8 + 6 = 21

=> Sum received by :

$$A = \frac{7}{21} \times 4200 = \text{Rs. } 1400$$

$$B = \frac{8}{21} \times 4200 = \text{Rs. } 1600$$

$$C = \frac{6}{21} \times 4200 = \text{Rs. } 1200$$

On adding Rs. 200 to the share of each one, the required ratio

$$= 1600 : 1800 : 1400$$

$$= \mathbf{8 : 9 : 7}$$

Question 139

Ms. Suchi deposits an amount of Rs. 24,000 to obtain a simple interest at the rate of 14 p.c.p.a. for 8 years. What total amount will Ms. Suchi get at the end of 8 years?

- A Rs. 62080
- B Rs. 28,000
- C Rs. 50,880
- D Rs. 26,880
- E None of these

Answer: C

Explanation:

Principal = Rs. 24,000

$$S.I. = \frac{24000 \times 14 \times 8}{100}$$

$$= \text{Rs. } 26,880$$

$$\therefore \text{Total amount} = 24000 + 26880$$

$$= \text{Rs. } 50,880$$

Question 140

The average of 5 consecutive even numbers A, B, C, D and E is 52. What is the product of B & E?

- A 2916
- B 2988

- C 3000
- D 2800
- E None of these

Answer: D

Explanation:

Let the 5 consecutive even numbers be = $(x), (x + 2), (x + 4), (x + 6), (x + 8)$

Sum of these 5 consecutive numbers = $52 * 5 = 260$

$$\Rightarrow (x) + (x + 2) + (x + 4) + (x + 6) + (x + 8) = 260$$

$$\Rightarrow 5x = 260 - 20 = 240$$

$$\Rightarrow x = 48$$

$$\Rightarrow B = x + 2 = 48 + 2 = 50$$

$$E = x + 8 = 48 + 8 = 56$$

$$\therefore B \times E = 50 * 56 = 2800$$

Question 141

- A 630
- B 885
- C 420
- D 900
- E None of these

Answer: B

Explanation:

Let the number be x

Difference of % = $(42 - 28)\% = 14\%$

Acc to ques,

$$\Rightarrow \frac{14}{100} \times x = 210$$

$$\Rightarrow x = \frac{210 \times 100}{14} = 1500$$

\therefore Required answer

$$= \frac{59}{100} \times 1500 = 885$$

Each of the questions below consists of a question and two statements numbered I and II are given below it. You have to decide whether the data provided in the statements are sufficient to answer the question. Read both the statements and :

Give answer a: If the data in Statement I alone are sufficient to answer the question, while the data in Statement II alone are not sufficient to answer the question.

Give answer b: If the data in Statement II alone are sufficient to answer the question, while the data in Statement I alone are not sufficient to answer the question.

Give answer c: If the data in Statement I alone or in Statement II alone are sufficient to answer the question.

Give answer d: If the data in both the Statements I and II are not sufficient to answer the question.

Give answer e: If the data in both the Statements I and II together are necessary to answer the question.

Question 146

What is the area of the circle?

I. Perimeter of the circle is 88 cms.

II. Diameter of the circle is 28 cms.

- A If the data in Statement I alone are sufficient to answer the question, while the data in Statement II alone are not sufficient to answer the question.
- B If the data in Statement II alone are sufficient to answer the question, while the data in Statement I alone are not sufficient to answer the question.
- C If the data in Statement I alone or in Statement II alone are sufficient to answer the question.
- D If the data in both the Statements I and II are not sufficient to answer the question.
- E If the data in both the Statements I and II together are necessary to answer the question.

Answer: C

Explanation:

I : Perimeter = $2\pi r = 88$

⇒ $2 \times \frac{22}{7} r = 88$

⇒ $r = 88 \times \frac{7}{44} = 14 \text{ cm}$

Thus, area = πr^2

= $\frac{22}{7} \times (14)^2 = 616 \text{ cm}^2$

Thus, statement I alone is sufficient.

II : Diameter = 28 cm

$$\Rightarrow \text{Radius, } r = \frac{28}{2} = 14 \text{ cm}$$

Thus, area = πr^2

$$= \frac{22}{7} \times (14)^2 = 616 \text{ cm}^2$$

Thus, statement II alone is sufficient.

\therefore Either statement alone is sufficient.

\Rightarrow Ans - (C)

Question 147

What is the rate of interest?

I. Simple interest accrued on an amount of Rs. 25,000 in two years is less than the compound interest for the same period by Rs. 250.

II. Simple interest accrued in 10 years is equal to the principal.

- A If the data in Statement I alone are sufficient to answer the question, while the data in Statement II alone are not sufficient to answer the question.
- B If the data in Statement II alone are sufficient to answer the question, while the data in Statement I alone are not sufficient to answer the question.
- C If the data in Statement I alone or in Statement II alone are sufficient to answer the question.
- D If the data in both the Statements I and II are not sufficient to answer the question.
- E If the data in both the Statements I and II together are necessary to answer the question.

Answer: C

Explanation:

I : Principal amount = Rs. 25,000

$$\text{Difference between SI and CI} = P \left(\frac{r}{100} \right)^t$$

$$\Rightarrow 25000 \left(\frac{r}{100} \right)^2 = 250$$

$$\Rightarrow 2.5r^2 = 250$$

$$\Rightarrow r^2 = \frac{250}{2.5} = 100$$

$$\Rightarrow r = \sqrt{100} = 10\%$$

Thus, statement I alone is sufficient.

II : Let principal amount = Rs. $100x$

$$\text{SI after 10 years} = \frac{P \times R \times T}{100}$$

$$\Rightarrow 100x = \frac{100x \times r \times 10}{100}$$

$$\Rightarrow 10r = 100$$

$$\Rightarrow r = \frac{100}{10} = 10\%$$

Thus, statement II alone is sufficient.

\therefore Either statement alone is sufficient.

\Rightarrow Ans - (C)

Question 148

What is the number of trees planted in the field in rows and columns?

I. Number of columns is more than the number of rows by 4.

II. Number of trees in each column is an even number.

- A** If the data in Statement I alone are sufficient to answer the question, while the data in Statement II alone are not sufficient to answer the question.
- B** If the data in Statement II alone are sufficient to answer the question, while the data in Statement I alone are not sufficient to answer the question.
- C** If the data in Statement I alone or in Statement II alone are sufficient to answer the question.
- D** If the data in both the Statements I and II are not sufficient to answer the question.
- E** If the data in both the Statements I and II together are necessary to answer the question.

Answer: D

Explanation:

To find the number of trees planted, we need to find the product of number of rows and columns.

Clearly, we cannot find the number of columns and rows from each statement alone, thus by combining both the statements, we get :

Let number of columns = c and number of rows = r

Also, number of rows, r is even and $c = r + 4$

Still, we cannot find the columns and rows.

Thus, both statements even together are insufficient.

Question 149

What is the area of the right-angled triangle?

I. Height of the triangle is three-fourth of the base.

II. Hypotenuse of the triangle is 5 metres.

- A** If the data in Statement I alone are sufficient to answer the question, while the data in Statement II alone are not sufficient to answer the question.
- B** If the data in Statement II alone are sufficient to answer the question, while the data in Statement I alone are not sufficient to answer the question.
- C** If the data in Statement I alone or in Statement II alone are sufficient to answer the question.
- D** If the data in both the Statements I and II are not sufficient to answer the question.
- E** If the data in both the Statements I and II together are necessary to answer the question.

Answer: E

Explanation:

Clearly, from each statement alone we cannot find the sides of the triangle, hence the area of triangle. Thus, by combining both statements, we get :

Let base = $4x$ m and height = $3x$ m

$$\text{Hypotenuse} = 5 = \sqrt{(4x)^2 + (3x)^2}$$

$$\Rightarrow 16x^2 + 9x^2 = 5^2$$

$$\Rightarrow 25x^2 = 25$$

$$\Rightarrow x^2 = \frac{25}{25} = 1$$

$$\Rightarrow x = \sqrt{1} = 1$$

Thus, base = 4 m and height = 3 m

$$\Rightarrow \text{Area of triangle} = \frac{1}{2} \times 4 \times 3 = 6 \text{ m}^2$$

\therefore Both statements together are sufficient.

\Rightarrow Ans - (E)

Question 150

What is the father's present age?

I. Father's present age is five times the son's present age.

II. Five years ago the father's age was fifteen times the son's age that time.

- A If the data in Statement I alone are sufficient to answer the question, while the data in Statement II alone are not sufficient to answer the question.
- B If the data in Statement II alone are sufficient to answer the question, while the data in Statement I alone are not sufficient to answer the question.
- C If the data in Statement I alone or in Statement II alone are sufficient to answer the question.
- D If the data in both the Statements I and II are not sufficient to answer the question.
- E If the data in both the Statements I and II together are necessary to answer the question.

Answer: E

Explanation:

Clearly, from each statement alone we cannot find their present ages, thus, by combining both statements, we get :

Let son's present age = x years

\Rightarrow father's present age = $5x$ years

According to ques,

$$\Rightarrow (5x - 5) = 15(x - 5)$$

$$\Rightarrow 5x - 5 = 15x - 75$$

$$\Rightarrow 15x - 5x = 75 - 5$$

$$\Rightarrow 10x = 70$$

$$\Rightarrow x = \frac{70}{10} = 7 \text{ years}$$

and father's age = $5 \times 7 = 35$ years

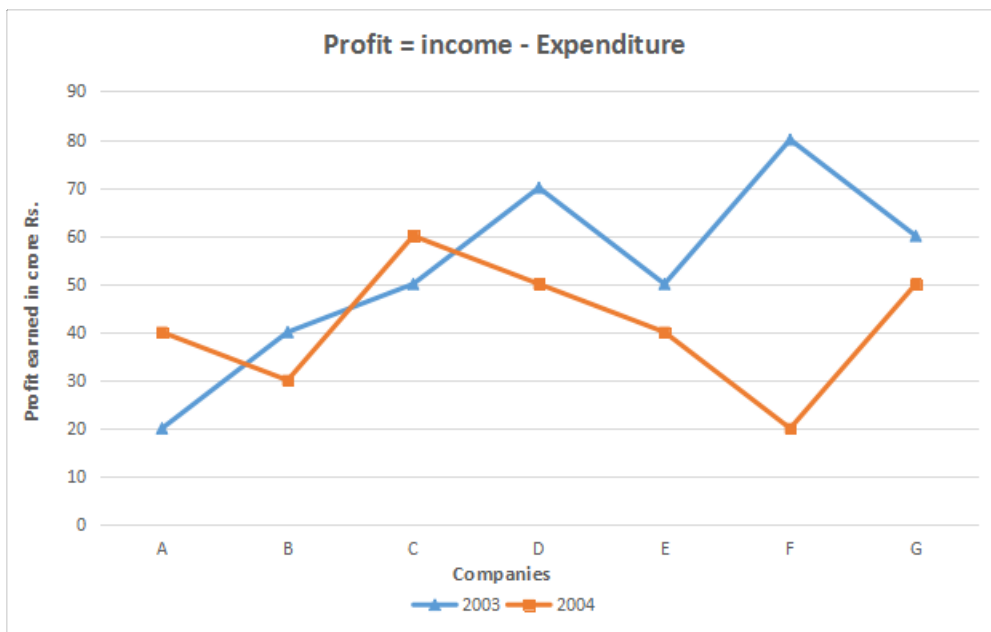

\therefore Both statements together are sufficient.

\Rightarrow Ans - (E)

In a certain code DUPLICATE is written as MRVFJFVBE. How is CARTOUCHE written in that code?

- A UTBEQWDJF
- B UTBZQFJDW
- C UTBEQLJDW
- D UTBEPFJDW
- E None of these

Answer: D

Explanation:
