Instructions
For the following questions answer them individually

Question 1
Three of the following four number-pairs are like in a certain way and one is different. Pick the number-pair that is different from the rest.

A 13 : 171
B 8 : 66
C 7 : 51
D 10 : 98
Answer: D

Explanation:
From the given terms,
13 : 171 is related as $13^2 + 2 = 171$
8 : 66 is related as $8^2 + 2 = 66$
7 : 51 is related as $7^2 + 3 = 51$
10 : 98 is related as $10^2 - 2 = 98$
Hence, option D is different from the rest of the terms.

SSC CGL Free Mock Test

Question 2
In a code language, ARDOUS is written as 1184152119. How will SYSTEM be written as in that language?

A 19251921513
B 19251920514
C 18251820513
D 19251920513
Answer: D

Explanation:
Given that,
The letter and it's sequence is given as per the english alphabet sequence.
A → 1
R → 18
D → 4
O → 15
U → 21
S → 19
Similiearly,
S → 19
Hence, the number will be 19251920513

**Question 3**

The sum of the current ages of Asma and her grand father is 80 years. 10 years from now, Asma’s age will be one-fourth of her grandfather’s age. What is Asma’s current age?

A 12 years  
B 20 years  
C 10 years  
D 16 years  

**Answer:** C

**Explanation:**

Let Asma’s age = \(x\)  
So, the age of grandfather of Asma = \(80 - x\)  
The age of Asma after 10 years will be \(x + 10\)  
So, the age of grandfather of Asma = \(80 - (x + 10) = 90 - x\)  

As per the condition is given in the question,

\[
x + 10 = 4\]
\[
4x + 40 = 90 - x
\]
\[
4x + x = 90 - 40 = 50
\]
\[
x = 5 = 10
\]

Hence, Asma’s current age = 10 Years.

**Question 4**

Select the missing number from the given options.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>8</td>
<td>27</td>
<td>?</td>
</tr>
<tr>
<td>7</td>
<td>2</td>
<td>3</td>
</tr>
<tr>
<td>9</td>
<td>5</td>
<td>7</td>
</tr>
</tbody>
</table>

A 64  
B 16  
C 25  
D 36  

**Answer:** A
Explanation:
In the given table,
The pattern is in all the column is same,
First-term of first column $8 = 2^3$ and third term = (second term) $7 + 2 = 9$
First-term of second column $27 = 3^3$ and third term = (second term) $2 + 3 = 5$
So, first term of the third column will $7 - 3 = 4$ Hence, the first term will be $4^3 = 64$
Hence, option A is the correct answer.

125 SSC CGL Mocks for just Rs. 199

Question 5
Arrange the following words in a logical and meaningful order.
1. Hunger
2. Cry
3. Feeding
4. Child
5. Sleep
6. Mother

A 4, 1, 2, 3, 5, 6
B 4, 1, 3, 6, 5, 2
C 4, 5, 2, 6, 3, 1
D 4, 1, 2, 6, 3, 5

Answer: D

Explanation:
Given in the question,
1. Hunger
2. Cry
3. Feeding
4. Child
5. Sleep
6. Mother
Now, the correct order of the above terms will be,
(4) Child (1) Hunger (2) Cry (6) Mother (3) Feeding (5) Sleep
Hence, the correct order is 412635.

Question 6
Which number will replace the question mark (?) in the following series?
118, 129, 141, 154, 168, ?

A 184
B 182
C 181
D 183

Answer: D
Explanation:
As per the given pattern in the question,

\[
(118) + 11 \rightarrow (129) + 12 \rightarrow (141) + 13 \rightarrow (154) + 14 \rightarrow (168) + 15 \rightarrow (183)
\]

Hence, next term will be 183.

**Question 7**
Select the option that is related to the third number in the same way as the second number is related to the first number.

7 : 344 :: 11 : ?

**Options**

A. 1331  
B. 1332  
C. 122  
D. 121  

**Answer:** B

**Explanation:**
The relation between the number is given as per the blow pattern

\[
7^3 + 1 = 344 \\
11 + 1 = 1332
\]

Hence option B is the correct answer.

---

**SSC CGL Previous Papers (DOWNLOAD PDF)**

**Question 8**
In a code language, INFORMATIVE is written as ROFNILEVITA. How will SUPERFICIAL be written as in that language?

**Options**

A. LAICIGREPU  
B. USEPRFICAI  
C. REPUSELAICI  
D. REPUSGLAICI  

**Answer:** C

**Explanation:**
INFORMATIVE is written as from left to ROFNILEVITA

Middle term M is written (-1) as L and remaining half of the terms is written as ROFNIL EVITA

Similiarly, SUPERFICIAL is written as

SUPERFICIAL half of the terms is written as REPUSELAICI

---

**Question 9**
Select the figure that will come next in the following figure series.

![Figure Series](image)
As per the given pattern,

The bubble in the image is jumping the boxes as per the given pattern- 1, 2, 3, 4 as so on but the dark strip is moving with the same pattern.

Hence, the correct answer is option D.

Question 10

How many triangles are there in the following figure?

Answer: D

A 30
B 24
C 26
D 28

Answer: D
Explanation:
As per the mentioned diagram,

Hence, total number of triangle = 12 + 12 + 4 = 28

25 SSC CHSL Mocks for just Rs. 149

Question 11
Which two signs should be interchanged to make the following equation correct?
24 ÷ 12 – 6 × 6 + 2 = 18

A × and +
B + and ÷
C + and –
D ÷ and ×

Answer: B

Explanation:
Given that,
24 ÷ 12 – 6 × 6 + 2 = 18

Now, interchanging the sign % with +
24 + 12 – 6 × 6 ÷ 2 = 18

Question 12
Three different positions of the same dice are shown. Which symbol will be on the face opposite to the one having ‘&’?

A +
B #
In the given Venn diagram, the pentagon represents 'Cricketers', the square represents 'Chess players' and the circle represents 'Clerks'. The numbers given in the diagram represent the number of persons in that particular category.

How many cricketers are chess players but NOT clerks?

A 36  
B 34  
C 22  
D 40  

Answer: C

Explanation:
As we can in the diagram, after removing the shaded portion from the diagram,
There is only 22 persons who are cricket players and also playing chess.

SSC CGL Tier-2 Previous Papers PDF

Question 14

Select the correct mirror image of the given figure when the mirror is placed to the right of the figure.
Two statements are given, followed by three conclusions numbered I, II and III. Assuming the statements to be true, even if they seem to be at variance with commonly known facts, decide which of the conclusions logically follow(s) from the statements.

Statements:
All postcards are envelopes.
No envelope is a paper.

Conclusions:
I. Some envelopes are postcards.
II. No paper is an envelope.
III. No postcard is a paper.

A. All the conclusions, I, II and III, follow
B. Only conclusions I and II follow
C. Only conclusions I and III follow.
D. Only conclusions II and III follow

Answer: A

Explanation:
As per the question,
Statement I - All postcards are envelopes, so some envelopes can be postcards.
Statement II - No envelop is paper so no paper can be envelope and no envelop can be paper vice versa.
Hence, Option A is the correct answer.

Question 16
Which letter-cluster will replace the question mark (?) in the following series?
PRT, TVX, ?, BDF, FHJ
Question 17

‘Valuable’ is related to ‘Precious’ in the same way as ‘Dry’ is related to ‘ ..........’

A Rough
B Wet
C Farm
D Arid

Answer: D

Explanation:
Valuable is the synonyms of the Precious.
Similarly Dry is the synonyms of Arid.

Question 18

Three of the following four words are alike in a certain way and one is different. Pick the odd word out.

A Ears
B Nose
C Eyes
D Throat

Answer: D

Explanation:
Eye, Nose, and Ear are the sensitive part of the human bodies which is visible from outside. The throat is also part of the human body but is not visible from the outside of the human body. Hence is odd from the other given options.
Question 19
Select the missing number from the given options.

<table>
<thead>
<tr>
<th></th>
<th>A</th>
<th>B</th>
<th>C</th>
<th>D</th>
</tr>
</thead>
<tbody>
<tr>
<td>64</td>
<td>49</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>12</td>
<td>17</td>
<td>4</td>
<td></td>
<td></td>
</tr>
<tr>
<td>20</td>
<td>24</td>
<td>8</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

A 12
B 16
C 36
D 25

Answer: B

Explanation:
As per the given table, only option B is following the pattern. The logic is mentioned in the below table:

<table>
<thead>
<tr>
<th></th>
<th>64</th>
<th>49</th>
<th>?</th>
</tr>
</thead>
<tbody>
<tr>
<td>12</td>
<td>17</td>
<td>4</td>
<td>8</td>
</tr>
</tbody>
</table>

Question 20
Three of the following four-letter-clusters are alike in a certain way and one is different. Pick the odd one out.

A SUXBG
B OQTXC
C BDGKP
D JLKRW

Answer: D

Explanation:
Apart from the option D, all the option following the same pattern.

\[
\begin{align*}
&\text{A) } S + 1(T \text{ missing}) \rightarrow U + 2(V, W \text{ missing}) \rightarrow X + 3(Y, Z, A \text{ missing}) \rightarrow B + 4(C, D, E, F) \rightarrow G \\
&\text{B) } O + 1(P \text{ missing}) \rightarrow Q + 2(R, S \text{ missing}) \rightarrow T + 3(U, V, W \text{ missing}) \rightarrow X + 4(Y, Z, A, B) \rightarrow C \\
&\text{C) } B + 1(C \text{ missing}) \rightarrow D + 2(E, F \text{ missing}) \rightarrow G + 3(H, I, J \text{ missing}) \rightarrow K + 4(L, M, N, O) \rightarrow P 
\end{align*}
\]
Select the figure in which the given figure is embedded. (rotation is not allowed).

Answer: D

Explanation:
The given pattern in the question is available in the
Question 22
Which letter will replace the number (2) in the following series?

A  X
B  W
C  Z
D  Y

Answer: D

Explanation:
Given that,
In this pattern, there is an alternate 1 letter skip pattern as per the English alphabet.

So, here 2 should be replaced by Y

General Science Notes for SSC CGL

Question 23
Select the word-pair in which the two words are related in the same way as are the two words in the following word pair.

Dermatology : Skin

A  Paediatrics : Lungs
B  Orthopaedics : Bones
C  Medicine : Treatment
D  Cardiology : Angiography

Answer: B

Explanation:
Dermatology- It is the branch of the medicine which is dealing with the skin.
Orthopedics- It is the branch of the medical specialty that deals with the treatment of the bones.

Question 24
Select the option that depicts how the given transparent sheet of paper would appear if it is folded at the dotted line.
Explanation:
The paper folding will be as per the below, after folding.

Hence, option B is the correct answer.

Question 25
‘A + B’ means ‘A is the brother of B’.
‘A - B’ means ‘A is the wife of B’.
‘A × B’ means ‘A is the daughter of B’.
‘A ÷ B’ means ‘A is the father of B’.
If P + S × Q × R - T ÷ V ÷ U, then how is T related to P?

A  Maternal grandmother
B  Paternal grandfather
C  Maternal grandfather
D  Paternal grandmother

Answer: C

Explanation:
Given that,
‘A + B’ means ‘A is the brother of B’
‘A - B’ means ‘A is the wife of B’
‘A × B’ means ‘A is the daughter of B’
‘A ÷ B’ means ‘A is the father of B’

From the above, translating the relation,
P is the brother of S
S is the daughter of Q, Q is the daughter of R, R wife of T, T is the father of V, V is the father of U.

Hence, T is the maternal grandfather of P

B Myanmar (Burma)
C Bangladesh
D China

Answer: C

SSC CGL Free Mock Test
Quant

Instructions
For the following questions answer them individually

Question 51
In $\triangle ABC$, P is a point on BC such that $BP : PC = 3 : 4$ and Q is the midpoint of AP. Then $\text{ar}(\triangle ABQ) : \text{ar}(\triangle ABC)$ is equal to:

A $3 : 8$
B $2 : 7$
C $1 : 4$
D $3 : 14$

Answer: D

Explanation:
Given that,

In $\triangle ABC$, P is a point on BC such that $BP : PC = 3 : 4$
Q is the midpoint of AP.
We know that if two triangles have the same height, then the ratio of the area of the triangle is always equal to the ratio of their base length.

\[
\text{ar}(\triangle ABC) = \text{ar}(\triangle ABP) + \text{ar}(\triangle PBC)
\]

\[
\frac{\text{ar}(\triangle ABP)}{BP} = \frac{\text{ar}(\triangle PBC)}{PC}
\]

But, \(\text{ar}(\triangle APC) = PC\)

In \(\triangle ABP\) and \(\triangle APC\), both have the same height, so

\[
\frac{\text{ar}(\triangle ABP)}{3} = \frac{\text{ar}(\triangle APC)}{4}
\]

So, \(\Rightarrow \text{ar}(\triangle ABP) = 3k\) and \(\text{ar}(\triangle APC) = 4k\)

Now,

\[
\Rightarrow \text{ar}(\triangle ABC) = 3k + 4k = 7k
\]

\((i)\)

Now, in \(\triangle ABP\)

\[
\Rightarrow \text{ar}(\triangle ABP) = \text{ar}(\triangle AQB) + \text{ar}(\triangle QBP)
\]

But \(\triangle AQB\) and \(\triangle QBP\) have the same height,

\[
\frac{\text{ar}(\triangle AQB)}{1} = \frac{\text{ar}(\triangle QBP)}{1}
\]

\(\Rightarrow \text{ar}(\triangle AQB) = \text{ar}(\triangle QBP)\)

\[
\text{ar}(\triangle ABP) = 3k
\]

\[
\Rightarrow \text{ar}(\triangle ABQ) = \frac{3k}{2} = \frac{3k}{2}
\]

\((ii)\)

Hence,\(\text{ar}(\triangle ABQ) = \frac{3k}{2}\)

From equation \((i)\) and \((ii)\)

\[
\frac{\text{ar}(\triangle ABQ)}{3k} = \frac{2}{2} = \frac{2}{2}
\]

\[
\Rightarrow \text{ar}(\triangle ABC) = 7k
\]

\[
\text{ar}(\triangle ABQ) = 3
\]

\(\Rightarrow \text{ar}(\triangle ABC) = 14
\)

**Question 52**

The radii of two bases of a frustum of height 10.5 cm is 5 cm and 3 cm. What is its volume in cm \(^3\)? \((\pi = \frac{22}{7})\)

- A 552
- B 545
- C 539
D  564

Answer: C

Explanation:
It is given that,
radii of two bases of a frustum are \( R = 5 \text{cm} \) and \( r = 3 \text{cm} \)
Height \( h = 10.5 \text{cm} \)
\[ \pi = \frac{22}{7} \]
\[ \pi \times h \times \left( R^2 + r^2 + R \times r \right) \]
Volume of the frustum \( V = \frac{22 \times 10.5 \times \left( 5^2 + 3^2 + 5 \times 3 \right)}{7 \times 3} \]
\( V = \frac{22 \times 10.5 \times \left( 25 + 9 + 15 \right)}{7 \times 3} \]
\( V = \frac{22 \times 10.5 \times 49}{7 \times 3} \]
\( V = 22 \times 3.5 \times 7 \]
\( V = 539 \text{cm}^3 \)

Question 53
Table shows the production of rice (in million tonnes) of three states over six years.

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>5.2</td>
<td>5.4</td>

<td>6.2</td>
<td>6.5</td>
<td>6.9</td>
</tr>
<tr>
<td>B</td>
<td>3.8</td>
<td>4.1</td>
<td>4.4</td>
<td>4.8</td>
<td>5.2</td>
<td>5.7</td>
</tr>
<tr>
<td>C</td>
<td>4.5</td>
<td>5.2</td>
<td>5.8</td>
<td>6.4</td>
<td>6.7</td>
<td>7.4</td>
</tr>
</tbody>
</table>

What is the average production of rice in state A over the years (in million tonnes)?

A 5.8
B 6.1
C 6
D 5.9

Answer: C

Explanation:
From the given table,
The production of the rice = 5.2 + 5.4 + 5.8 + 6.2 + 6.5 + 6.9 = 36 million tonnes
Hence, the average production of the rice in state A = \( \frac{36.0}{6} = 6 \text{million tonnes} \)

Question 54
Two articles are sold for \( ₹ 4880 \), on one, the seller gained 22% and on the other, he lost 20%. What is his overall gain or loss percentage, nearest to one decimal place?

A 3.4% loss
B 3.4% gain
Explanation:
Let the cost price of the first article =x Rs. and the cost price of the second article =y Rs.
sold the price of both article =4880 Rs.
seller getting gain on the first article =22%
seller facing loss on the second article=20%

We know that,
\[
\text{Gain} = \frac{(\text{Soldprice} - \text{Costprice}) \times 100}{\text{Costprice}}
\]
\[
\Rightarrow 22 = \frac{(4880 - x) \times 100}{x}
\]
\[
\Rightarrow 22x = 4880 \times 100 - 100x
\]
\[
\Rightarrow 22x + 100x = 4880 \times 100
\]
\[
\Rightarrow 122x = 4880 \times 100
\]
\[
\Rightarrow x = 40 \times 100
\]
\[
\Rightarrow x = 4000 \text{Rs.}
\]

Hence, the net amount of loss in the first article = 4880 - 4000 = 880 Rs.

We know that,
\[
\text{Loss} = \frac{(\text{Costprice} - \text{Soldprice}) \times 100}{\text{Costprice}}
\]
\[
\Rightarrow 20 = \frac{(y - 4880) \times 100}{y}
\]
\[
\Rightarrow 20y = 100y - 4880 \times 100
\]
\[
\Rightarrow 100y - 20y = 4880 \times 100
\]
\[
\Rightarrow 80y = 4880 \times 100
\]
\[
\Rightarrow y = 60 \times 100
\]
\[
\Rightarrow y = 6000 \text{Rs.}
\]

Hence, the net amount of loss in the second article = 6100 - 4880 = 1220 Rs.

Hence, the net loss in the = 1220 - 880 = 340 Rs.

Total cost price of both the articles is 6100 + 4000 = 10100
\[
\Rightarrow 340 \times 100
\]

So overall loss percentage = \[
\frac{10100}{340 \times 100}
\]

\[
\Rightarrow \text{Required percentage} = 3.4\%
\]
Question 55

In a class of 60 students, 40% are girls. The average weight of the whole class is 59.2 kg and the average weight of the girls is 55 kg. What is the average weight of the boys?

A 62 kg  
B 61 kg  
C 60 kg  
D 63 kg  
Answer: A

Explanation:
Let the total weight of the girls are \( w_1 \) and the total weight of the girls are \( w_2 \)  
Given that the total number of student = 60  
\[ \frac{40 \times 60}{100} = 24 \text{ girls} \]

Hence, total number of boy = \( 60 - 24 = 36 \) Kg  
The average weight of total student \( \frac{w_1 + w_2}{60} = 59.2 \text{Kg} \)
\[ \Rightarrow w_1 + w_2 = 59.2 \times 60 \text{Kg} \]  --- (i)

Average weight of girls 24 = 55Kg
\[ \Rightarrow w_1 = 55 \times 24 \text{Kg} \]  --- (ii)

Now, from equation (i) and (ii)
\[ \Rightarrow 55 \times 24 + w_2 = 59.2 \times 60 \text{Kg} \]
\[ \Rightarrow w_2 = 59.2 \times 60 - 55 \times 24 \text{Kg} \]
\[ \Rightarrow w_2 = 3552 - 1320 \text{Kg} \]
\[ \Rightarrow w_2 = 2232 \text{Kg} \]
So, average weight of the girls = \( \frac{2232}{36} = 62 \text{Kg} \)

Question 56

In a circle of radius 13 cm, a chord is at a distance of 5 cm from its center. What is the length of the chord?

A 24 cm  
B 18 cm  
C 12 cm  
D 20 cm  
Answer: A

Explanation:
It is given that the radius of the circle \( AO = OB = 13 \text{ cm} \)
the distance of the chord from the center = 5 cm,
We know that the minimum distance of a line from a point is always perpendicular to the line.
Now applying the Pythagoras theorem,

\[ AO^2 = AD^2 + DO^2 \]

Now, substituting the values,

\[ AD^2 = AO^2 - OD^2 = 13^2 - 5^2 \]

taking the square root of both side,

\[ AD = \sqrt{144} = 12 \text{ cm} \]

As we know, from the rule of circle

The perpendicular from the center to the chord, always bisect the chord,

Hence, the length of the chord \[ AB = 2 \times AD = 2 \times 12 = 24 \text{ cm} \]

**Question 57**

The efficiencies of A, B and C are in the ratio of 2 : 3 : 5. Working together, they can complete a task in 6 days. In how many days will A alone complete 20% of that task?

A  4
B  8
C  5
D  6

**Answer:** D

**Explanation:**

As per the question,

The efficiencies of A, B and C are in the ratio of 2 : 3 : 5

So the ratio in the time taken by them will be 2 : 3 : 5

\[ \frac{1}{x} : \frac{1}{x} : \frac{1}{x} \]

So, A can finish the work in = 2 days

\[ \frac{2}{x} \]

A can finish the work in one day = \[ \frac{2}{x} \]

B can finish the work in = 3 days

\[ \frac{3}{x} \]

B can finish the work in one day = \[ \frac{3}{x} \]

and C can finish the work in = 5 days

\[ \frac{5}{x} \]
C can finish the work in one day \( = x \).

It is given that together they can finish the work in 6 days,

\[
\text{Hence together they can finish the work in one day} = 6
\]

So, if they are working together, then they can finish the work in one day \( x + x + x = x \)

\[
\Rightarrow x = 6
\]

\[
\Rightarrow x = 60
\]

So, A alone can finish the work \( \frac{60}{20} = 30\) days.

Hence, A can finish the 20% of the work in \( = 30 \times 100 = 6\) days.

25 SSC CHSL Mocks for just Rs. 149

Question 58

If \( 3 \sin \theta = 4 \cos \theta \), then \( \tan^2 \theta + \sin \theta - \cos \theta \) is equal to:

A \( \frac{88}{45} \)

B \( 2 \)

C \( \frac{89}{45} \)

D \( \frac{17}{9} \)

Answer: C

Explanation:
Given that,

\( 3 \sin \theta = 4 \cos \theta \)

\[ \tan \theta = 3 \]

Let \( AB=4 \) and \( BC=3 \)

From the phythogoras theorem,
Now, substituting the values in $AB^2 + BC^2 = AC^2$

Now, substituting the values, 

$\Rightarrow AC = \sqrt{AB^2 + BC^2}$

$\Rightarrow AC = \sqrt{4^2 + 3^2}$

$\Rightarrow AC = \sqrt{25} = 5$

Now, substituting the values in $\tan^2 \theta + \sin \theta - \cos \theta$

$\Rightarrow \frac{4}{2} + 3$

$\Rightarrow 3 + 5 - 5$

$\Rightarrow 16 + 4 - 1$

$\Rightarrow 9 + 5$

$\Rightarrow 9 + 5$

$\Rightarrow 80 + 9$

$\Rightarrow 45 + 45$

$\Rightarrow 89$

$\Rightarrow 45$

Question 59

If $\sqrt{x} + \frac{1}{\sqrt{x}} = 2\sqrt{2}$, then $x^2 + \frac{1}{x}$ is equal to:

A 102

B 34

C 104

D 100

Answer: B

Explanation:

Given that,

$\sqrt{x} + \frac{1}{\sqrt{x}} = 2\sqrt{2} \quad \text{(i)}$
Taking square of both side,
\[ (\sqrt{x} + \frac{1}{\sqrt{x}})^2 = (2\sqrt{2})^2 \]
\[ (\sqrt{x})^2 + (\frac{1}{\sqrt{x}})^2 + 2 \times \sqrt{x} \times \frac{1}{\sqrt{x}} = 8 \]
\[ x + 1 + 2 = 8 \]
\[ x + 1 = 6 \]

Now, again taking square of both sides.
\[ (x + x)^2 = 6^2 \]
\[ x^2 + x^2 + 2 \times x \times x = 36 \]
\[ x^2 + x^2 + 2 = 36 \]
\[ x^2 + x^2 = 34 \]

**Question 60**

What is the value of x so that the seven digit number 6913 x 08 is divisible by 88?

A 6  
B 4  
C 2  
D 8

**Answer:** D

**Explanation:**

Given that,

6913 x 08

The given number will be divisible by 88 if it will be individually divisible by 11 and 8.

**Divisibility of 8:**

Any number is divisible by 8 if the last three digits of that number will be divisible by 8. 
the minimum possible value for which it is divisible by 8 is x=0,2,4,6,8

**Divisibility by 11:**

A number is divisible by 11 if we subtract and then add the digits in an alternate pattern from left to right, if it is either 0 or 11, then it will be divisible by 11 otherwise not.

\[ 6913x08 \]
\[ (8 + x + 1 + 6) - (0 + 3 + 9) = 15 - 12 + x = 3 + x \]

There is only one value for which both are satisfying the condition, which is x=8.

Hence, the number will be 6913808.
Hence, the minimum value of x should be 8.
Question 61
An article is sold for ₹ 612 after successive discounts of 25% and 15%. What is the marked price of the article?

A ₹960
B ₹940
C ₹1000
D ₹980

Answer: A

Explanation:
Let the marked price of the article =x Rs
It is that there are two successive discounts of 25% and 15%.

Hence the new price of the article ⇒ \( x \times 100 \times 100 = 612 \)
\( \frac{75}{3} \times \frac{85}{17} \)
\( (x) \times 4 \times 20 = 612 \)
\( 51x \)
\( \Rightarrow 80 = 612 \)
\( \Rightarrow 51x = 612 \times 80 \)
\( 612 \times 80 \)
\( \Rightarrow x = \frac{51}{80} \times \frac{612}{80} \)
\( \Rightarrow x = 960Rs \)

Question 62
\( \triangle ABC \sim \triangle RQP \) and PQ = 10 cm, QR =12 cm and RP = 18 cm. If \( \text{ar}(\triangle ABC) : \text{ar}(\triangle RQP) = \frac{4}{9} \), then AB is equal to:

A \( \frac{20}{3} \) cm
B 8 cm
C 9 cm
D 12 cm

Answer: B

Explanation:
Given the question,
\( \triangle ABC \sim \triangle RQP \)
PQ = 10 cm, QR =12 cm and RP = 18 cm
\( \text{ar}(\triangle ABC) : \text{ar}(\triangle RQP) = \frac{4}{9} \)
As per the rule of similar triangle,
We know that $\text{ar}(\triangle ABC) : \text{ar}(\triangle RQP) = (RQ)^2 = (QP)^2 = (RP)^2$

Now, substituting the values

$$\text{ar}(\triangle ABC) \quad AB$$
$$\Rightarrow \text{ar}(\triangle RQP) = (12)^2$$
$$AB = 4$$
$$\Rightarrow (12)^2 = 9$$

Taking square root of both side,

$$AB = 2$$
$$\Rightarrow 12 = 3$$
$$2$$
$$\Rightarrow AB = 3 \times 12$$
$$\Rightarrow AB = 8\text{cm}$$

Question 63

Walking at $\frac{3}{4}$ of his usual speed, a person reaches his office 18 minutes late than the usual time. His usual time in minutes is:

A 72
B 45
C 60
D 54

Answer: D

Explanation:
Let the distance between his home to his office = $d$ and his usual speed is = $v$

Now, usual time is taken by the man to reaching office $(t) = \frac{d}{v} - \cdots - \cdots - \cdots - \cdots - \cdots - (i)$

As per the question,

the new speed of man = $\frac{3v}{4}$

So, $\Rightarrow 18 + t = \frac{d}{\frac{3v}{4}}$

$\Rightarrow 18 + t = 3d - \cdots - \cdots - \cdots - (ii)$

From the equation (i) and (ii)
If $a : b = 2 : 3$, then $(5a + 3b) : (6a - 2b)$ is equal to:

A 3 : 2
B 17 : 5
C 10 : 7
D 19 : 6

Answer: D

Explanation:
Given that,

$$a : b = 2 : 3$$

Let $b = 3k$

So, $a = 2k$ and $b = 3k$

Now substituting the values in the below,

$$(5a + 3b) = (5 	imes 2k + 3 	imes 3k)$$

$$(6a - 2b) = (6 	imes 2k - 2 	imes 3k)$$

$$10k + 9k = 19k$$

$$12k - 6k = 6k$$

$$19$$

$$6$$

Hence the required ratio 19:6
Question 65

Table shows the production of rice (in million tonnes) of three states over six years.

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>5.2</td>
<td>5.4</td>
<td>5.8</td>
<td>6.2</td>
<td>6.5</td>
<td>6.9</td>
</tr>
<tr>
<td>B</td>
<td>3.8</td>
<td>4.1</td>
<td>4.4</td>
<td>4.8</td>
<td>5.2</td>
<td>5.7</td>
</tr>
<tr>
<td>C</td>
<td>4.5</td>
<td>5.2</td>
<td>5.8</td>
<td>6.4</td>
<td>6.7</td>
<td>7.4</td>
</tr>
</tbody>
</table>

If the total production in three states in all six years is represented by a pie-chart, what is the central angle of the sector representing production in the year 2014, (to nearest whole number)?

A 65°
B 61°
C 59°
D 63°

Answer: D

Explanation:
From the above table,
Total production of the rice in the year of 2014 = 6.2 + 4.8 + 6.4 = 17.4 million tonnes
Total production of the rice in all the six years = 100 million tonnes

Hence the angle subtended at the center = \( \frac{17.4 \times 360}{100} = 62.64 \)°

Question 66

If \( \cosec 3\theta = \sec(20^\circ + 2\theta) \), then \( \theta \) is equal to:

A 14°
B 20°
C 30°
D 15°

Answer: A

Explanation:
\[ \cosec 3\theta = \sec(20^\circ + 2\theta) \]
We know that \( \cosec(90^\circ - \theta) = \sec \theta \)
\[ \Rightarrow \cosec 3\theta = \cosec(90^\circ - 20^\circ - 2\theta) \]
\[ \Rightarrow \cosec 3\theta = \cosec(70^\circ - 2\theta) \]
From the above,
\[ \Rightarrow 3\theta = 70^\circ - 2\theta \]
\[ \Rightarrow 5\theta = 70^\circ \]
\[ \Rightarrow \theta = 14^\circ \]
Instructions

Table shows the production of rice (in million tonnes) of three states over six years.

Question 67
What is the percentage increase in the production of rice in B from 2014 to 2016?

A 17.75
B 17.25
C 18.75
D 18.25

Answer: C

Explanation:
Production of rice in the state B in 2014 = 4.8 million tonnes
Production of rice in the state B in 2016 = 5.7 million tonnes

\[
\text{Hence, the required percentage} = \frac{(5.7 - 4.8) \times 100}{4.8} = 18.75\%
\]

Question 68
What is the ratio of the production of rice in all three states in the year 2014 to that in 2016?

A 89 : 100
B 85 : 102
C 85 : 103
D 87 : 100

Answer: D

Explanation:
As per the given table in the question,
Production of rice over the three states in 2014 = 6.2 + 4.8 + 6.4 = 17.4 million tonnes
Production of rice over the three states in 2016 = 6.9 + 5.7 + 7.4 = 20.0 million tonnes

\[
\text{Hence, the required percentage} = \frac{200}{174} \approx 115.47\%
\]

Instructions
For the following questions answer them individually

Question 69
The value of: \(7.5 + \left\{ \frac{5.4}{4.5} \times 2 \right\} - 8 \times 4 \div 3.2\)

A -0.2
B 0.1
Answer: C

Explanation:
Given that,

\[ 7.5 + (5.4 \div 4.5 \times 2) - 8 \times 4 \div 3.2 \]
\[ \Rightarrow 7.5 + (1.2 \times 2) - 8 \times 4 \div 3.2 \]
\[ \Rightarrow 7.5 + (2.4) - 8 \times 4 \div 3.2 \]
\[ \Rightarrow 7.5 + (2.4) - 8 \times 1.25 \]
\[ \Rightarrow 7.5 + (2.4) - 10.00 \]
\[ \Rightarrow 9.9 - 10.00 \]
\[ \Rightarrow -0.1 \]

General Science Notes for SSC CGL

Question 70

The value of \( \sin^2 20^\circ + \sin^2 70^\circ - \tan^2 45^\circ + \sec 60^\circ \) is equal to:

A 2
B 1
C 2.5
D 3

Answer: A

Explanation:
Given that,

\[ \sin^2 20^\circ + \sin^2 70^\circ - \tan^2 45^\circ + \sec 60^\circ \]
We know that, \( \cos(90 - \theta) = \sin \theta \)
\[ \sin^2 20^\circ + \cos^2(90^\circ - 70^\circ) - \tan^2 45^\circ + \sec 60^\circ \]
\[ \Rightarrow \sin^2 20^\circ + \cos^2 20^\circ - \tan^2 45^\circ + \sec 60^\circ \]
We know that \( \sin^2 \theta + \cos^2 \theta = 1 \)
So,
\[ \Rightarrow 1 - \tan^2 45^\circ + \sec 60^\circ \]
We know that \( \tan 45 = 1 \) and \( \cos 60^\circ = \frac{1}{2} \)

Now, substituting the values
\[ 1 \]
\[ \Rightarrow 1 - 1 + \cos 60^\circ \]
\[ \Rightarrow 1 - 1 + 1 \]
\[ \Rightarrow 2 \]
Question 71
The arc ABC of a circle with centre O subtends 132° at the centre. The chord AB is extended to the point P. The angle ∠CBP is equal to

A 48°  
B 66°  
C 76°  
D 68°

Answer: B

Explanation:
As per the given question,
Angle subtended by the arc = 132°
Now,

As we know, from the property of circle,
\[2 \times \angle ADC = \angle AOC\]
\[\Rightarrow 2 \times \angle ADC = 132°\]
\[\Rightarrow \angle ADC = \frac{132°}{2}\]
\[\Rightarrow \angle ADC = 66° \quad \text{(i)}\]

Now, ABCD is a cyclic quadrilateral,
So as the property of the cyclic quadrilateral
\[\angle ADC + \angle ABC = 180°\]
\[\Rightarrow \angle ABC = 180° - \angle ADC\]
\[\Rightarrow \angle ABC = 180° - 66° = 114° \quad \text{(ii)}\]

We know that angle subtended on the straight line = 180°
Now, \[\angle ABC + \angle CBP = 180°\]
\[\angle CBP = 180° - \angle ABC = 180° - 114° = 66°\]
\[\Rightarrow \angle CBP = 66°\]

Question 72
The difference between compound interest and simple interest on ₹ x at 8% per annum for 2 years is ₹ 48. What is the value of x?

A 7500  
B 7400  
C 8000  
D 7800

Answer: A
Explanation:
Given that,
Principle amount = Rs. x
Rate of interest = 8%
time = 2 years
Difference between the compound interest and simple interest = Rs. 48
We know that Compound interest = A - P, where A is the total amount and P is the principle amount
\[ A = P \left(1 + \frac{R}{100}\right)^n \]
Now, substituting the values, \[ A = x \left(1 + 100\right)^2 = x(1.08)^2 = 1.1664x \]
So, Compound Interest = 1.1664x - x = 0.1664x \[ (i) \]
Now, for the simple interest,
\[ SI = \frac{P \times R \times t}{100} \]
Now, substituting the values,
\[ x \times 8 \times 2 \]
\[ SI = \frac{100}{100} = 0.1600x \]
\[ (ii) \]
Hence from the equation (i) and (ii)
the required difference \[ CI - SI = 48 \]
\[ 0.1664x - 0.1600x = 48 \]
\[ 0.0064x = 48 \]
\[ x = 7500Rs. \]

Question 73
If \( a + b + c = 6 \) and \( a^3 + b^3 + c^3 - 3abc = 126 \), then \( ab + bc + ca \) is equal to:
A 12
B 8
C 5
D 6
Answer: C

Explanation:
Given that,
\( a + b + c = 6 \)
\( a^3 + b^3 + c^3 - 3abc = 126 \)
We know that \((a + b + c)^2 = (a^2 + b^2 + c^2 + 2ab + 2bc + 2ca)\)
\[ 6^2 - (2ab + 2bc + 2ca) = a^2 + b^2 + c^2 \]
\[ 36 - 2(ab + bc + ca) = a^2 + b^2 + c^2 \]
\[ (i) \]
Now, 
\[ a^3 + b^3 + c^3 - 3abc = (a + b + c)(a^2 + b^2 + c^2 - ab - bc - ca) \]  
(substituting the values in equation (i) and (ii),

\[ \Rightarrow 126 = (6)(36 - 2ab - bc - ca - ab - bc - ca) \]
\[ \Rightarrow 126 = (6)(36 - 3ab - 3bc - 3ca) \]
\[ \Rightarrow 126 = 6 \times 36 - 18ab - 18bc - 18ca \]
\[ \Rightarrow 18ab - 18bc - 18ca = 216 - 126 \]
\[ \Rightarrow ab + bc + ca = 18 \]
\[ \Rightarrow ab + bc + ca = 5 \]

Question 74
If \( a + b = 5 \) and \( ab = 3 \), then \( (a^3 + b^3) \) is equal to:

A. 75  
B. 80  
C. 70  
D. 65  

Answer: B

Explanation:
Given that \( a + b = 5 \) and \( ab = 3 \)
We know that, \( (a + b)^3 = a^3 + b^3 + 3ab(a + b) \)
\[ \Rightarrow a^3 + b^3 = (a + b)^3 - 3ab(a + b) \]  
Now, substituting the values in the equation (i)
So, \( \Rightarrow a^3 + b^3 = (5)^3 - 3 \times 3(5) \)
\[ \Rightarrow a^3 + b^3 = 125 - 45 \]
\[ \Rightarrow a^3 + b^3 = 80 \]

Question 75
The price of sugar is increased by 24%. A person wants to increase his expenditure by 15% only. By what percentage, correct to one decimal place, should he reduce his consumption?

A. 7.1  
B. 7.3  
C. 6.9  
D. 7.5  

Answer: B

Explanation:
Let the initial price of the sugar is Rs. \( x \) and the expenditure is also Rs. \( x \).
When the rate of sugar is increased by 24% \( \frac{124x}{100} = 1.24x \)
So, new rate of the sugar = 100 \[ \frac{x}{1.24x} = 1.24x \]
Increase in expenditure = 15%

\[ 115x \]

So, new expenditure = 100 = 1.15x

\[ (1.24x - 1.15x) \times 100 = 0.09 \times 100 \]

Hence, the required percentage = \[ \frac{1.24x}{1.24} = 1.24 \]

\[ \Rightarrow \text{percentage of reduction in consumption} = 7.3\% \]

Questions:

**Question 76**
Select the correctly spelt word.

A qiete
B quiet
C queit
D quiete

Answer: B

**Question 77**
Select the most appropriate synonym of the given word.
ASSIST

A help
B create
C change
D mend

Answer: A

**Question 78**
Select the word which means the same as the group of words given.
That which cannot be heard

A hidden
B inaudible
C slight
D invisible

Answer: B
Question 79
Choose the option that is the passive form of the sentence.
A campus fire in California caused the death of at least twenty-three persons.

A  The death of at least twenty three persons will be caused in a campus fire in California.
B  The death of at least twenty three persons was caused by a campus fire in California.
C  At least twenty-three person's death was caused in a campus fire in California.
D  The death of at least twenty three persons caused a campus fire in California.
Answer: B

Daily Free SSC Practice Set

Question 80
Identify the segment in the sentence, which contains the grammatical error.
"Unless you did not do your homework you will be punished," said the teacher.

A  Unless you did not
B  said the teacher.
C  do your homework
D  you will be punished
Answer: A

Question 81
Select the most appropriate synonym of the given word
INTRICATE

A  complex
B  complete
C  connected
D  colorful
Answer: A

Question 82
Select the most appropriate antonym of the given word.
ABSURD

A  sensible
B  selfish
C  sentimental
D  sensitive
Answer: A
Question 83
Select the most appropriate option to fill in the blank. When you want to expand your vocabulary the best thing to do is to relate a known word with an _____ one and guess the meaning from the context.

A  unnecessary
B  unfamiliar
C  essential
D  unclear

Answer: B

Question 84
Given below are four jumbled sentences. Select the option that gives their correct order.
A. If the mixture becomes too thick add more milk.
B. Finally, add sugar and nuts, and your kheer is ready.
C. Boil milk in a heavy-bottomed pan and add rice.
D. Cook for about twenty minutes stirring every once in a while till the mixture thickens.

A  DACB
B  BADC
C  ADCB
D  CDAB

Answer: D

Question 85
Select the alternative that will improve the underlined part of the sentence in case there is no improvement select “No improvement”
I am very much pleased to see you here today.

A  No improvement
B  very pleasing
C  very pleased
D  too much pleased

Answer: C

Question 86
Select the correctly spelt word.

A  restaurent
B  roberry

Answer: B
In order to ______ to a new place you may need to adjust to the ways of that culture.

A avoid
B adapt
C adhere
D adopt

Answer: B

Instructions
In the following passage some words have been deleted. Fill in the blanks with the help of the alternatives given. Select the most appropriate option for each blank.

Comprehension:
Although a wild elephant, Chinna Thambi did not grow up entirely in the wild. For over the last (1) ______ he has had easy (2)______ to food at Thadagam, a village surrounded by the Western Ghats near Coimbatore. Brick (3) ______ tempted him with (4)______ of water and he loved the palm pith that was used as (5)______ for baking bricks.

Question 88
Select the most appropriate option to fill in blank No.(1)

A annual
B summer
C festival
D decade

Answer: D

Free SSC Study Material (18,000 Solved Questions)

Question 89
Select the most appropriate option to fill in blank No.(2)

A entry
B access
C way
D approach

Answer: B

Question 90
Select the most appropriate option to fill in blank No.(3)
Question 91
Select the most appropriate option to fill in blank No.(4)

A load
B many
C much
D plenty

Answer: D

Question 92
Select the most appropriate option to fill in blank No.(5)

A logs
B fuel
C matter
D fodder

Answer: B

Instructions
For the following questions answer them individually

Question 93
Select the most appropriate meaning of the underlined idiom in the given sentence.
Throughout his speech the crowd was all ears.

A making a lot of noise
B talking loudly
C very attentive
D covering their ears

Answer: C

Question 94
Choose the option that is the active form of the sentence.
It was decided by the members that the report would be placed before the Chairman for his comments.
A. Did the members decide to place the report before the Chairman?

B. The Chairman’s comments were to be placed on the report of the members.

C. The members decided to place the report before the Chairman for his comments.

D. The Chairman decided to place the report before the members.

Answer: C

**Question 95**
